Abbreviations and Symbols

A = manuscripts of the Abhinaya-darpana from Adyar Library.

A. C. = after Christ.

AD. = Abhinayadarpana.

B. = manuscript of the Bharataśāstra-grantha.

Bh.A. = Bharatārnava.

Ch. ed = Chowkhamba edition.

I = manuscripts (known as the Abhinavadarbana) from the India Office.

Mbh. = Mahūbhūrata.

MG=The Mirror of Gestures, ed. Coomaraswamy and Duggirala.

N = Nandike svara

NS = Bharata-Nātyaśāstra, (Chowkhamba edition).

P = manuscript of the so-called Bharatarnava from Poona.

Rāghavabhatta = this author's commentary of the \hat{S} akuntalā (sometimes).

 $R = R\bar{a}m\bar{a}yana.$

SR = Samgītaratnākara.

V = manuscript of the Abhinayadarpana in the Visvabharati.

श्रीमनोमोहन-घोषस्य

PREFACE

The original text of Nandikeśvara's Abhinayadarpaṇa, now placed before the public, has never before been edited, or printed in the Devanāgarī character. Uptil now The Micror of Gestures (ed. Coomarswamy and Duggirala, Cambridge, Mass. 1917), which is a partial translation of the work, was the only means by which the Sanskritists in general could study its contents. But this translation, excellent in its own way, suffered from the drawback of its original which was a corrupt text. And, as will be evident to one who carefully goes through the Select Glossary (pp. 44-48), the work contains some new lexical materials. Thus the critical edition of the Abhinayadarpaṇa may be said to have been undertaken with considerable justification.

The present work written in simple Sanskrit verses does not present any great linguistic difficulty, but its contents, being on one of the less frequently-studied subjects in Indology, it has been given an introduction which may be considered disproportionately long. But this length may not probably be considered useless; for, in it the editor has tried to discuss what seemed to him to be important issues connected with the text and its subject-matter. It may be hoped that such a discussion will stimulate interest in the history of the ancient Hindu dance and histrionic art—a study much needed for obtaining a proper view of the Hindu culture in its varied aspects. Dr. A. K. Coomaraswamy's writings on the subject especially his valuable introduction to The Mirror of Gestures have already done much in this direction. The present editor has tried to follow in his lines, and this humble work may be considered a continuation of his work.

It cannot, however, be claimed that the editor has been able to execute his work in a faultless fashion. For example, the passages quoted from the $N\bar{a}tya\bar{s}\bar{a}stra$ has not been critically edited. Though our quotations are mostly on the basis of the Chowkhambā text, in some cases they are made out by a compromise between it and

the Kāvyamālā text, and variants have very sparingly been noticed. As a critical edition of the passages did not seem to be much necessary for our purpose in the introduction, we have remained satisfied with the above procedure. Besides this there may be other imperfections, which it is hoped, will be excused by generous readers.

For the purpose of this book works of several scholars have been helpful to me, and they have been mentioned in proper places in the body of the book. But among them all Professors A. B. Keith and Sten Konow and Drs. S. K. De and A. K. Coomaraswamy should be specially mentioned.

I must also acknowledge here the various kinds of assistance I have received, while editing the work, from my friends and wellwishers. In this connexion the name of Principal Vidhushekhara Bhattacharya (Shastri) of Visyabharati, naturally comes first to my mind. For, it was at his suggestion that during my stay in Santiniketan I undertook the work. After procuring, through the Visvabharati, the necessary MSS. of the text for my use he very keenly watched the progress of the work and facilitated its completion in various ways. It is with genuine pleasure that I record here most gratefully the kindness of Principal Bhattacharya. desired very much that the work should be published by the Visyabharati, and the MS. of the work actually lay for some time with the publication department of the institution. But, unfortunately for myself, owing to financial reasons the Visvabharati had to curtail considerably its varied and useful activities which included the publication of old Skt. texts; and as no assurance could be given me that the work would be taken up in the near future, I at last desired to take back the MS. with a have this published from elsewhere. Then Principal view to Bhattacharya, though with reluctance, readily gave me the necessary permission, and was glad to learn that it would be published very soon.

Next I owe a deep debt of gratitude to Rabindranath Tagore, who honoured the first draft of a portion of the introduction, in MS., by a careful perusal. It was at his suggestion that the same was

published in the Visvabharati Quarterly (Vol. V, 1927, pp. 93 ff.). It goes without saying that the encouragement which I thus very fortunately received at the hand of the great creative artist whose understanding of our ancient culture, especially its artistic traditions, is so well known, gave me a new inspiration as it were, to study my subject with an ever increasing interest.

Besides this, I am very much indebted to Professor Suniti Kumar Chatterji who very kindly glanced over, in proof, a portion of the English translation and the introduction and made a few suggestions which have profited me and led mostly to the improvement of my work. I am also to acknowledge here with cordial thanks the occasional help I received from my friend Mr. Haridas Mitra, M. A., in the shape of suggestions about the method of work, and some useful references. Mr. Mitra has, besides, devoted his valuable time for having the illustrations drawn. But for the care he has taken the work would have been issued without any illustration. For this friendly assistance he has laid me under a deep obligation. As for the actual execution of the excellent drawings that have been given along with the text I owe it to Mr. Nandalal Bose of Visvabharati (Kalābhavana) who very kindly supervised the work of the artist, his pupil, who was entrusted with the work. For this I am very sincerely thankful to Mr. Bose.

This preface cannot be concluded without mentioning Pandit Amareswar Thakur, M.A., Ph.D., the Director of the Calcutta Sanskrit Series, who very kindly accepted this work for publication in the above-mentioned collection. Lastly I should mention Mr. Narendra Chandra Bhattacharya, M.A., Vedāntatīrtha etc., the learned Reader to the Series, whose scholarly interest has saved me from many printing mistakes and many a lapsus calami. But for Mr. Bhattacharya's care the list of errors, excepting those which have occurred due to the breaking of types, might have been bigger. My best thanks are due to him.

Calcutta,
January, 1934

Manomohan Ghosh

Notes on Illustration

Four drawings have been inserted in this work mainly for showing how the āngika abhinaya is closely connected with painting and sculpture (Vide Introduction, pp xxix-xxxi). Different gestures and postures, which they are examples of, have been mentioned below; and more such examples can be gathered from old paintings, sculptures and bas-reliefs. Some of them have been collected at the end of The Mirror of Gestures.

The following is a description of the drawings and their sources:

- 1. A Dancing Girl (frontispiece).—This illustrates the Sundarī neck (80-81) and the Parivāhita head (64-65). It is from the cave-painting of Ajantā. [Vide John Griffiths, The Painting in the Buddhist Cave-Temples of Ajantā, Khandesh, India. Vol. I. Plate 6 of the Cave I].
- 2. Naṭarāja Śiva (facing page 1).—This illustrates Sama head (67-68); its raised lest hand denotes the Ardacandra gesture (III-II3). This is the famous bronze figure preserved in the Madras Museum. [Vide Plate LVI of the ibid.].
- 3. Astabhuja Siva (facing page 18).—Its right hands (beginning from the upmost one) denote the Kapittha (121-124), Bhramara (152-154), Kartarīmukha (105-107) and Patāka (93-100) gestures respectively and the left hand (beginning from the upmost one) denote the Patāka (93-100), Kāngula (144-146), Ardhacandra (111-113) and Alapadma gestures respectively. This is from the Kailāsanātha-svāmin temple at Conjeevaram [Vide T. A. Gopinath Rao, Elements of Hindu Iconography Vol. II, Parl. I. Plate LXX.]
- 4. A Dancing Girl (facing page 41).—This illustrates the *Udvāhita* head (52) and the *Ekapāda Bhramarī* posture (295). This is from the basrelief of Boroboudur [*Vide*. M. P. Verneuil, *L' Art a Java*, (Les Temples de la Period Classique Indo-Javanaise) Plate XXVII].

INTRODUCTION

(1)

THE PRESENT EDITION. Though the Nataku a typical form of the Hindu drama, forms a large section of Sanskrit literature, our knowledge about the way in which the art of producing a play developed in India is still very inadequate. This is due mostly to a lack of sufficient materials. The only work which gives us some idea of the Hindu stage is the Bharata-Nātyašāstra. Yet for the study of the history of the development of ancient Indian theatrical art, this work, though very important in many respects, is not quite sufficient by itself. We need therefore make no apology in offering for the first time a critical edition of Nandikeśvara's Abhinaya-darpana, which exclusively treats of gestures in a manner rather different from the NS., which also has these among other things as its subjects of treatment. The Mirror of Gestures published with a very illuminating introduction by Dr. A. K. Coomaraswamy claims to be a translation of this work. But on comparing it with our text it has been found out that the text used in preparing the MG. is not exactly identical with the AD. though the former has absorbed a major part of the latter work and supplemented the same by making occasional quotations from other works of the same class (see § 2). And an important feature of our text is its treatment of items like postures and movements etc. dependent on the feet, such as mandala¹, sthānaka, cārī and gati. which although omitted by the original of the MG. is indispensably necessary for the complete understanding of the Hindu histrionic art.

I. For the meaning of this term and the following ones, see 'Select Glossary' at the end.

The MG, though it did not fully represent the AD, has been a very useful contribution to our knowledge regarding the production of Hindu plays. The present edited text of the AD, will, it many be hoped, supplement such a knowledge, for in it some fresh materials have been brought to light for the first time.

- 2. THE TRANSLATION. The translation has not been made very literal. Students of Sanskrit will however experience little difficulty about the language of the AD. A few words which have been used in it with special import and may for this reason offer difficulty to readers have been explained in the Select Glossary.
- 3. CRITICAL APPARATUS. The present text has been reconstructed from the five manuscripts of which two are complete and the rest fragmentary. The two complete MSS, do not fully agree with each other regarding the order in which various topics have been treated. In this respect the fragmentary MSS, also vary with the complete ones as well as among themselves. The following description of the MSS, will among other things notice this mutual variation.
- M. A Devanāgarī transcript of the only complete MSS. (in the Telugu script) of the work (No. 304 of the collection made in 1893-1894) in the possession of the Madras Government Oriental MSS. Library (*vide* p. xxix of the Report of a Search of the Sanskrit and Tamil MSS. for the year 1893-1894 by Sheshagiri Shastri).

The various topics have been treated in this MS. in the following order:

4	
Ι.	नाट्यप्रशंसा

2. सभापतिलक्षणम्

3. मन्त्रिलक्षणम्

4. सभालक्षणम्

5. पात्रलक्षणम्

वर्जनीयपात्राः

7. पात्रस्य प्राणाः

8. प्रार्थना

9. रङ्गाधिदेवतास्तुतिः

10. उपाङ्गलक्षणम्

11. शिरोभेदलक्षणम्

12. दृष्टिभेदलक्षणम्

13. ग्रीवाभेदलक्षणम्

14. हस्तभेदाः

15.	असंयुतहस्तलक्षणम्	24.	पाद्भेदाः
16.	संयुतहस्तलक्षणम्	24a.	नवरसाः
17.	देवताहस्तलक्षणम्	24b.	अवस्थाभेदाः (दशावस्थाः)
18.	द्शावतारहर-तलक्षणम्	25.	मण्डलभेदाः
1 9.	तत्तजातीयहस्तलक्षणम्	26.	स्थानकमेदाः
20.	बान्धव्यहस्तलक्षणम्	27.	प्रवनभेदाः
21	नृत्तहस्तानां गतयः	58	भ्रमरीलक्षणम्
22.	नृत्तहस्तलक्षण म्	29.	चारी भेदाः
23.	नवग्रहहस्तलक्षणम्	30.	गतिभेदाः

V. A palm-leaf MS. (fairly complete) in the Telugu script, in the possession of the Visyabharati, Santiniketan. It bears the number 3038. Its size is $16\cdot2''\times1''$ and it has 29 leaves. This MS. puts the $b\bar{a}ndhava-hasta-lakṣaṇam$ last of all and omits the navagrahahasta-lakṣaṇam, navarasāh, saḍrasāḥ and avasthā-bhedāḥ(daśāvasthāḥ). And moreover its treatment of the nrtta-hastāḥ and pāda-bhedāḥ is incomplete.

A¹. A palm leaf MS. (not complete) in the Telugu script with a Telugu ṭikā from the Adyar Library. It has 53 leaves. It bears the number XXII. C. 25. Its size is 5.8"×1.4".

This MS. arranges topics in the following order:

4.*	सभारुक्षणम्	18.	दशावतारहस्तळक्षणम्
2.	सभापतिलक्षणम्	19.	तत्तज्ञातीयहस्तलक्षणम्
4.	सभालक्षणम् (contd.)	20.	बान्धन्यहरूतलक्षणम्
6.	पात्रनिषेधः	12.	अष्टदृष्टिलक्षणम्
5.	पांत्रलक्षणम्	15.	असंयुतहस्तलक्षणम्
	''आस्येनालम्बयेद गीतम् etc.''	(0	nly व्याव्र-कटक-महि-अर्धसूची-
16.	संयुतहस्तलक्षणम्		लक्षणानि)
17.	देवताहरूतलक्षणम्	11.	शिरोभेदलक्षणम्

A². Another palm-leaf MS. (not complete) in the Telugu script from the Adyar Library. It bears the number XXII. C. 38.

Numbers used in this table and the following ones represent the serial numbers of items in M. (vide supra).

Its size is $85'' \times 1:2''$. It is partially injured and has 28 leaves. The topics have been treated in this MS, in the following order:

15 .	अ संयुतहस्त लक्षणम्	19.	बान्धव्यहस्तलक्षणम्
16.	संयुत इ स्तलक्षण म्	12.	दृष्टिभेदाः
15.	अ संयुतहस्तलक्षणम् (contd.)	13.	ग्रीवाभेदाः
	(व्याघ्र-अर्धसूची-कटक-पश्चिह्हस्तानां	9.	रङ्गाधिदेवतास्तुतिः
	लक्षणानि)	7.	पात्रलक्षणम्
17.	देवताहस्तलक्षणम्	4.	सभालक्षणम्
18.	दशावतारलक्षणम्	2.	राजलक्षणम् (सभापति)

 A^{3} . A paper MS. (not complete) in the Telugu script from the Adyar Library. It bears the number VIII. J. 9. Its size is $9.3'' \times 6.8''$ and has 14 pages. The following order has been observed by this MS. in the arrangement of topics—

1 5.	अ संयुतहस्तलक्षणम्	18.	दशावतारहस्तलक्षणम्
16.	संयुतहस्तलक्षणम्	19.	तत्तजातीयहस्तलक्षणम्
17.	देवताहस्तलक्षणम्		"आस्येनालम्बयेद गीतम् etc.

The four MSS, written in the Telugu script (V., A¹, A² and A³) have the following peculiarities:

- a. They often use ya, yi and $y\bar{\imath}$ for a, i and $\bar{\imath}$ respectively. One original ya standing for a had been shown in our text in ± 1.18 .
 - b. Kha and no are often changed to κa and a.
 - c. H is often substituted for the visarga (:).
- d. The reduplication of a letter is indicated in three MSS, by placing an $anusv\bar{a}ra$ before it.

Besides these five MSS of the AD the following printed work and MSS have been utilised for the reconstruction of the text.

MG. The *Mirror* of Gestures (Cambridge, Mass., 1917) edited by Dr. A. K. Coomaraswamy and Mr. Duggirala. This work is a translation of a Skt. text briefly described before (see § 1). The translation is based on the second edition (in the Telugu character) of the original published under the editorship of the late

Tiruvenkatacari of Nadamangalam (MG. p. 10). With reference to the passages that it has in common with the AD., the original of MG. in places seem to suffer from textual corruptions. But in spite of such defects this work renders valuable aid in determining the position of the navagraha-hastas which appear only in M. (see § 4). It arranges the subjects of its treatment in the following order. Items not occurring in reconstructed text of the AD. have been marked with asterisks.

Salutation.

* A dialogue between Indra and Nandikeśvara,

Variety of dances, Eulogy of Nāṭya, Definition of Nāṭya etc., Occasion for dances, Sabhā etc.

- * Seven limbs of the Sabhā,
 Sabhā-nāyaka,
 Ministers,
 Ranga,
 Pātra-lakṣaṇa,
 Pātra's disqualifications,
 Bells.
- * Nātya-laksaņa,
- * Pātrasya bahiḥ-prāṇāḥ, Pātrasya antaḥ-prāṇāḥ,
- * Nīcu-nātya,
- * Nīca-nāṭya-darśana-phalam, Nāṭya-kramaḥ, Āṅgika-abhinaya,

Nine movements of the Head,

* Twenty-four movements of the Head according to another work, Eight Glances,

- * Forty-four Glances according to another book
- * Six movements of the Brow according to another book,

Neck movements,

* Hasta-prāṇāḥ, Hasta-bhedāḥ,

Twenty-eight (Asamyuta hastas (with *alternative definitions for 24 hands from another book),

Twenty-three Samyuta-hustas,

- * Twenty-four Samuuta-hastas from another book,
- * Twenty-seven Samyuta-hastas from another book,

Eleven hands of Relationship, Hands of gods and goddesses,

" planets,

" ten Avatāras,

" four castes,

The following have been taken from another book:

- * Hands of famous emperors, famous rivers, seven upper worlds, seven lower worlds,
- * Hands indicating trees, land animals, birds and water animals.

I. From the India Office Library we received two MSS. (nos. 3028 and 3090) named AD. One of them is in the Telugu script and the other is a Devanāgarī transcript of the same. On an examination of these MSS, they proved to be a work dealing with abhinaya and $t\bar{a}la$ and probably belonging to the school of \bar{A} njaneya cited as an authority on sampita in various places; for the end of the abhinaya portion of this work reads as 'iti $a(\bar{a})$ njaneya-matam'. But this abhinaya portion is fragmentary and seems to be a compilation from different sources. Slokas 90-95, 96, 97b-98a, 101-102, 104-105 of the AD. occur in it with a few variations worthy of notice. The following passage from some other source occurs between 101 and 102.

कोपवीरस्समागल्यभावने(?) यदि निश्चलः । सन्ताने वृक्ष्मामी(?) च श्रृमध्ये देववाचकः ॥ भाष्राणे चुबुकस्थ्या (?) किञ्चिन्नासाश्रिताङ्गुलिः । नेत्रान्तिको (?) यदि कृतो निधिभाजनधारणे ॥ पत्रलेखे कपोले च ज्ञानार्थे पक्षनिश्चितः (?) । शकुने चापवादे च विधाने परिवर्त्तने ॥

Besides these the MS. contains the following passage which is found in the so-called *Bhuratārṇava* (vide infra) of the Bhandarkar Oriental Research Institute, Poona, with some variation:

आहौ पुष्पपुटो होयो अञ्चलिश्रतुरश्रकः ।
स्वस्तिकाभिधहस्तश्र कर्त्तरी स्वस्तिकः कर (ः) ॥
बोलावहिध्व(त्थ)कोत्थको चैव कर उत्तानविञ्चतः ।
कलशाभिधहस्तश्र पक्षविञ्चत एव च ॥
उत्सङ्गस्तिलको हस्तो नागवन्धश्र वैष्णवः ।
इत्येते संयुता हस्ता (ः) कविभिः षोडश (?) स्मृताः ॥

Nrttu-hustus mentioned in this work are from some unknown source and are as follows:

उद्भृताख्योस्तलमुखो विप्रकीर्णस्ततः परम् । गजदन्तै विध्यवटौ (१) सुचीविध्यकरस्तथा ॥ रेचिताख्यः करः प्रोक्त (?) अर्घ रेचित एव च ।
पछवश्च नितम्बश्च केशबन्धस्तथा लता ॥
कर-हस्तो दण्डपक्ष उर्ध्वमण्डलिसंज्ञकः ।
पार्श्वमण्डलिहस्तश्च पुरोमण्डलिनामकः ॥
निलनीपद्मकश्चेव कपोतो मकरस्तथा ।
ज्ञानहस्तोऽथ विज्ञेयो वरदाभयहस्तकः ।
मुदाहस्त स्वई(यो)विंशमृ(?)त्यहस्ताः प्रकीर्तिताः ॥

- P. This is the MS. no. 42 of the Appendix Collection A. (1916-18) of the Govt. MSS. Library placed with the Bhandarkar Oriental Research Institute, Poona. It has been entered in the Catalogue of the Institute published in 1925 as the Bharatārnava. This fact led to an examination of this MS. for the AD. according to a passage in the MG. was an abridgment of the Bharatārnava. The examination of the MS. however revealed the fact that the work though it possibly had some connexion with the BhA. was not itself the same. (For details see § 15.) In spite of this, the MS. which has certain passages in common with AD. was of help in reconstructing our text.
- B. This is the MS. no. 40 of the Appendix Collection A. (1916-1918) of the Govt. MSS. Library placed with the B. O. R. Institute, Poona. It has been named in the Catalogue of MSS. published by the Institute as the *Bharata-śāstra-grantha*. This work appears to be a curious compilation of passages from the following works:

अमरकोषः भावप्रकाशः रङ्गळक्ष्मीविल्रासः काञ्यप्रकाशः रज्ञम्हे रज्ञण्यप्रकाशः रज्ञमाला रज्ञाच्यप्रकाशः रज्ञमाला रागदीपिका गीता शब्दार्णवः सङ्गीतचूडामणिः मागवतम् हरिभक्तिस्रधोदयः भारतीय (नाट्यशास्त्रम्)

Besides quotations from the above mentioned works which this MS. names it contains passages from unmentioned sources which include Dandin and Nandikeśvara. The portions taken from the latter author's AD. consist of viniyogas of the Asamyuta-hastas. These offer some variants. The author of this Bharata-śāstra-yrantha appears to have been a commentator of the Prasanna-rāyhava; for he refers to himself in the following:

उदात्तादि-स्वरूपन्तु अस्मत्कृत-प्रसन्नरावव-टीकायाम् (f. 6).

RECONSTRUCTION. The present edition of the text of the AD. has been based principally on V., but the Nava-grahahasta-laksana which occurs only in M. has been accepted as belonging to the work. Support in this matter has been available from the MG, which does not ascribe it to granthantara though all its borrowings from works other than the AD. have been prefixed with such ascriptions. The fact that the planet-worship in India was not later than the early centuries of the Christian era¹ when the gods of the Puranic pantheon were probably evolving, may also give us additional justification to consider the Nava-graha-hasta-laksana as belonging to the original AD. For we do not know why planetary deities should be considered later than other deities who in their Puranic character were not probably very old. And as some of the planets have been mentioned in the Atharva-Veda, planetary deities may in fact be as old as some of the deities of the Vedic pantheon². Passages on Rasa and Avasthā which occur only in M. and have no support from MG., have not been included in the edited text. They have been separately shown at the end of the same (see p. 43 foot note).

ABHINAYA; ITS MEANING.

DRAMA AND THE HINDU PLAY. To understand properly the meaning of the word abhinaya (roughly speaking, the word for the histrionic art in Sanskrit) it is necessary to have a clear notion about the nature and spirit of the Hindu plays which are often called 'dramas.' A Hindu play which is called a dráya or preksya kāvya or nātya, or rūpa or rūpaka in Sanskrit, though it has some superficial resemblance to drama, is not identically equal to the same thing; rather there is a considerable difference between the two. The names such as $r\bar{u}pa$ and $dr\acute{s}ya$ $k\bar{a}vya$ which include all kinds of Hindu plays give us the clue to the difference. is called rūpa or rūpaka, i.e., 'having-a-form' on account of its visibility $(dr syat \bar{a})^{4}$. And the term $r \bar{u} paka$ is applied to a play on the analogy of a figure of a speech of the same name (i. e., rupaka or metaphor), because in a play we assume a non-distinction between characters (dramatis personae) and the actors representing them. And drśya (preksya) kāvya means a poem which is to be seen i.e., a poetical composition capable of being enjoyed not by its reading, but from its stage representation. The idea of action is missing altogether in these names. And the very nature of the Hindu play discloses its neglect of action³.

The word $n\bar{a}tya$, which is also a synonym for a $r\bar{u}pa$ or drsya $k\bar{a}vya$ and points to its lyrical nature, throws further light on the point. In accordance with the etymological meaning of this word which is derived from the root nat (=nrt) meaning 'to dance', Hindu plays are compositions in which rhythm and lyrical elements preponderate, and action is given a very minor scope'.

^{1.} Daśarūpa 1-8.

^{2.} Rasārņava-sudhākara. Trivendrum. III. 2. p. 209 also Duśarīipa 1.9.

^{3.} S. Rice, The Sanskrit Drama in Indian Arts and Letters. Vol. 1, pp. 96-97, 102.

^{4.} Levi, Le theâtre indien, pp. 29-30. S.Rice-Op. cit., p.89.

All these go to show that realism in the ordinary sense has no place in the Hindu plays. And after a closer examination of them one is sure to discover their suggestive character and the consequent demand on the imagination of the spectators. Those who are accustomed to realism in art may call that demand inordinate, but Hindu theorists on the subject believe that the highest aesthetic enjoyment is not possible without giving the greatest possible scope to imagination, and are therefore in favour of avoiding realism. For, no amount of making things appear as real to the spectators can be successful, unless the latter call imagination to their aid. In this connexion we may quote Prof. Lévi's apt remark in translation²: "Indian genius produced a new art which the word rasa summarizes and symbolizes, and which condenses it in one brief formula: 'the poet does not express but he suggests.'"

Having regard to these characteristics of the Hindu plays, they may perhaps suitably be called 'lyrico-dramatic spectacles', but not 'dramas' from which their aim and object as well as the attitude of their actors and spectators greatly differ.

6. THE OBJECT OF HINDU PLAYS. To evoke rasa in the spectator is the aim and object of the Hindu play-wright. The term rasa has been translated as 'flavour', 'sentiment' or 'poetic sentiment'. These translations, however, are of not much help to any one unless an explanation is offered. And the nature and characteristic of rasa will be clear when the relative position of the spectators and the actors is considered. "We see on the stage, for instance, Rāma, and Sītā who excites his affection, aided by suitable circumstances of time and place; this affection is intimated by speech and gesture alike, which indicate both dominant emotion of love and its transient shapes in the various stages of love requited. The spectacle evokes in the mind of the spectator the impressions of the emotion of love which experience has planted there, and this ideal and generic excitation of the emotion produces in him that sense of joy which is

^{1.} S. Rice, op. cit., p. 102.

^{2.} Le theâtre indien. p. 417.

known as sentiment (rasa). The fulness of the enjoyment depends essentially on the nature and experience of the spectator, to whom it falls to identify himself with the hero or other character, and thus to experience in *ideal form* his emotions and feelings. He may even succeed in his effort to the extent that he weeps real tears, but the sentiment is still one of exquisite joy. We may compare the thrill of pleasure which the most terrifying narration excites in us, and we are all conscious of the sweetness of sad tales"¹.

7. THE TECHNIQUE OF PLAYS. Before considering the literary technique as well as the technique of representation (abhinaya), the two means by which plays evoke rasa, attention would be paid to their main guiding principles. It is the doctrine of suggestion that lies at the basis of Hindu plays and indeed of all other arts of India. Hence it is found that a Hindu play-wright's method of depicting a character is different from that of his fellow-artist in the West. Instead of giving prominence to his varied activities, the Hindu play-wright would build up the character by mentioning characteristic emotional complexes suggestive of it as a whole.

That verses of varied forms are abundantly used in the Hindu plays is simply for the purpose of calling forth emotion by means of the lyrical element present in their musical recitation.

8. ABHINAYA. The Sanskrit word abhinaya is made up of the prefix abhi 'towards' and the root $n\bar{\imath}$ 'to carry'. Thus it means 'representing (carrying) a play to (towards) the spectators'. According to the $S\bar{a}hityadarpana$ that representation is called the imitation (or visualisation) of the conditions (physical and mental) of the characters in the drama*. But the aesthetic significance of the imitation will not be clear unless the object of the plays, viz., the evoking of rasa in the spectators, is taken into

^{1.} A. B. Keith, Sanskrit Drama, p. 321, (The italics in the quotation are ours).

^{2.} S. Rice, op. cit., p. 102.

^{3.} NŚ. VIII. 6;

^{4.} भवदिभिनयोऽवस्थानुकार:, Ch. VI. 2.

consideration. Hence we see Mallinatha, the famous commentator, defining abhinaya as movements for suggesting rasa (sentiment) and bhava (mood). For this reason, the word abhinaya may be said to be the means for disclosing to the spectators the beauty or manifold pleasurable aspects of the play which cannot be adequately appreciated by simply reading its text. In consideration of all these facts, abhinaya may be termed the 'suggestive imitation' of the various moods and emotional state of characters in a play. Therefore, in spite of an apparent similarity between abhinaya and acting, the latter term, whenever it is used in connection with Hindu plays, does not mean quite the same thing. From the word nuța (the Sanskrit word for 'actor' primarily meaning a dancer) and such words as natayati (derived from the same root nat meaning 'to dance', it appears that the ancient Hindus had their plays 'danced' and not 'acted'. This is corroborated by the evidence of the Harivamśa (Visnuparva, Ch. 93, Śl. 28) which uses an expression like 'nātakam nanrtuh' (danced a play). Rājašekhara (c. 10th century A.C.) too, in his prologue to the Karpūramanjarī has an expression like 'sattaam naccidavvam' (a sattaka is to be danced). Hence in course of the abhinaya of a play which is but a poem to be seen (dršya kāvya), rhythm in all its possible aspects plays an important part. And its rhythmical character conveyed through abhinaya and dance, made it suitable for the suggestion of the deepest and the most tender emotions which tend to evoke rasa (sentiment) in the spectators.

Depicting narratives by means of dance and abhinaya is still to be found in the Saiva ritualistic dances of the Nīlapūjā² found all over Bengal. The peoples of Java and Bali which can trace the history of its connection with India to a very remote past, still depict stories from the $Mah\bar{a}^bh\bar{a}^{a}uta$ and $Pur\bar{a}nas$ by means of dance. Rabindranath Tagore during his visit to those islands noticed such dances. Of this he writes that "in their plays

^{1.} अभिनयो रसभावादिव्यञ्जनविष्टाविशेषः, on the Kirātāryunīyam, X. 42.

^{2.} A popular festival in honour of Siva (=Nīlakantha) in the closing week of the Bengali year.

and musical performances, from beginning to end,—their movements, battle scenes, love-scenes, even their clowning,—everything is danced. One who knows their peculiar dance-language can follow the story with the help of words. The other day we witnessed a dance in the Rajah's palace which, we were told, represented the story of Śalva and Satyayatī; making it clear that not only emotion but also narration, is transmuted into dance by them". In that connection Tagore very clearly explains how rhythm and gestures—the two elements of dance may convey the beauty of a narrative to the spectators. "The events of human life," he says, "in their outward aspect, are all displayed as movement. So, when any event of outstanding importance has to be portrayed, it is but natural that its movement should be given a corresponding dignity by the addition of rhythmic grace. The dance here is just such giving of rhythmic prominence to the events of a story, keeping in the background, or leaving altogether, the words. The Puranic legends, which in poetry, have to make their appeal only through the ear, are here addressed to the eye. Of the words that are the vehicle of poetry, the rhythm is governed by the natural laws of music, but the meaning is artificial, depending on sound-symbols mutually adopted by men. Both are necessary for the poem. the dance of these people, likewise the rhythm alone is not sufficient for this kind of dance. Their tongue is silent, but the whole body does the talking by signs as well as by movements. Nothing could be more foreign to any actual field of battle than this form they give to their dance-warfare. But if some fairy land had been governed by the rule that fighting must be done rhythmically, a false step entailing defeat, then this is the kind of battle that would have been waged there. If any one is inclined to smile at such lack of realism, he needs must also laugh at Shakespeare, whose heroes not only fight in metre, but even die to it."3

I. Angika abhinaya or gesture is the essential of this dance-language.

^{2.} Letters from Java—The Visyabharati Quarterly, Vol. 6. No. 1. 1928, April, pp. 2-3.

^{3.} Ibid.

In addition to this Tagore refers to the historical dances of Japan and writes that, "There words are also used, but all the movements and gestures are of the dance type,—and they have a wonderful appeal. In dramas where the words are metrical, it is surely inconsistent to leave the movements realistic." Then regarding the Hindu dramas he says that "our very word for drama or play, $n\bar{a}taka$, shows that dance was its essential feature."

Unless we start with this conception that *abhinaya* is something allied to dancing, and meant for suggesting ideas and emotions to the spectators, we shall never be able to appreciate such merit as Hindu plays might possess. Besides this, one should consider in detail the four different branches into which *abhinaya* has been divided, viz., $\bar{a}ngika$, $v\bar{a}cika$, $\bar{a}h\bar{a}rya$, $s\bar{a}ttvika$.

(i) $\overline{A}ngika$ abhinaya is the use of artistic gestures. Its rules regulate the actors' bearing, walk and movements of features and limbs³. But consistently with the object which Hindu plays have, the forms of the gestures and movements prescribed in manuals of abhinaya (such as the AD.) are not quite realistic, and besides are often made with reference to imaginary objects. For instance, the way of holding a flower by a beau is not that in which it is ordinarily held, while a gesture may show that a bee is worrying a maiden though no actual bee be visible, and a particular movement of the body may show the ascending or descending from a palace which may not actually be represented on the stage⁴.

Abhinaya means not only carrying out occasional directions of the play-wright as regards the various special movements and positions which the dramatis personae are to assume, but also suggesting effectively to spectators the full aesthetic import of a play by suitably reproducing along with his speech or song, appropriate gestures codified in manuals on abhinaya. Even in carrying out the

directions of the play-wright the actors are to use gestures etc., as laid down in those manuals. All this will be clear from the following directions of Rāghavabhaṭṭa given in his commentary of the Śakuntalā (ed. Nirṇayasāgara), for depicting the vrkṣa-secana (watering the plants), bhramara-bādhā (the attack by the bee) and viṣāda (grief) etc. In these he has used the SR., a work later than the AD. (ride. § 18).

वृक्षसेचन—निक्तिपद्मकोशौ कृत्वा स्कन्धप्रदेशं नीत्वावधृतेन शिरसा मनाङ् नामितया देह्यप्ट्या च सहाधोमुखौ अवनीतौ (p. 27).

विषाद—धुतेन शिरसा विषण्णया हष्ट्या च (p. 89).

मुखोन्नयन-परिहार-परावृत्तेन शिरसा विनिगृहितेनाधरेण (p. 109).

कुछमावचय—वामहस्तेन उत्तानारालेन दक्षिणेन पुरः पाश्वांदिस्थितेनौवित्याच्युत-संयुक्तेन हंसास्येन (p. 115).

प्रसाधन—त्रिपताकानामिकया तिलकं पार्श्वमुखसंदंशाभ्यामुभयकरस्थाभ्यां माला-भ्रमराभ्यां तालपत्रद्वयं कर्णपूरद्वयम् (p. 129), कर्त्तरीमुखेन अलक्तकेन पाद्रञ्जनं इंसास्येन च्युतसन्दंशेनोर्मिकापरिधापनम् (p. 132).

गतिभङ्ग-- ऊरूढृतया चार्या (p. 139). अवतरण-- गङ्गावतरणेन (p. 189). रथाधिरोहण-- अर्ध्वजातुचार्या (p. 222).

The code of gestures and movements prescribed for the different limbs were binding on the nata; so much so, that in the matter of gesticulation the term originality can scarcely be applied to him, for what is required of him is not his own interpretation of a play, but a representation of the same in accordance with the prescribed rules. The ideal Hindu play-wright, as far as the language and the development of the plot are concerned, is to leave no obscurity which would require the interpretation of the nata, but in building up his characters, he

I. This Paravrtta head has been defined according to the AD, (see notes on 62).

(i. e., the play-wright) is to touch only those characteristic moods which, properly represented, would suggest the full aesthetic value he desires to impart to them.

To the nata the play is, as it were, a lyrical poem, and the abhinaga manuals, a record of the notation to be followed in setting the former to music. As the musician has neither the liberty nor the necessity of inventing new notes or haphazardly applying the existing ones, so the nata has no room for being original by inventing gestures etc., for that is the business of masters (ācāryas) of the art who know the theory and practice thoroughly. In consequence of this the spectators were spared the necessity of putting up with fanciful interpretations which individual natas might make at their cost. In spite of this the nata had sufficient scope for free grace and fitting variations on the usual play of limb.

- (ii) $V\bar{a}cika$ abhinaya may roughly be called the use of proper pronunciation, modulation, accent and rhythm². According to some Hindu theorists it occupies the first place in a play because all other branches of abhinaya viz., $\bar{a}ngika$, $\bar{a}h\bar{a}rya$ and $s\bar{a}ttvika$, depended more on it than it does on them³. But the meaning which they have for this $v\bar{a}cika$ abhinaya is more extensive than the modern rules of proper dramatic delivery. The use of different dialects and proper forms of address to persons according to their rank or social status are also included. These rules of the Hindu theorists are very elaborate and well adapted to bring out the lyrical qualities of a play.
- (iii) $\overline{A}h\overline{a}rya$ abhinaya. The costume and the appearance of the naṭa help him in his work. They reveal the sex, race, sect or class, social or other position of the character represented. The part which costume and physical decorations, etc., play is called the $\overline{a}h\overline{a}rya$ abhinaya

^{4.} Rāmdās Sen, op. cit., pp. 97-98, NS. XXIII. 2-3.

- (iv) Sattvika abhinaya. This is the representation of eight psychic conditions arising from the vital principle itself. These eight conditions are: motionlessness, perspiration, horripilation, change of voice, trembling, change of colour, tears and fainting. But, as these are sometimes to be expressed with the help of suitable gestures or movements of limbs, some modern scholars could, however, discover no distinction between the sattvika and angika abhinayas. But their confusion is due to overlooking the fact that while the angika abhinaya is mostly on external things and represents ideas, conveyed by words, and intellectual changes in a man, the sāttvika abhinaya is a thing expressing the psyche; because the eight conditions enumerated above proceed from the inmost recess of the soul and pervade the whole body. Owing to their distinctive and deep-seated nature, they (i.e., the eight conditions) form a separate branch of the abhinaya. But in spite of this possible distinction it cannot be denied that the sāttvika abhinaya has every chance of degenerating into the āngika abhinaya when the nata lacks the genius as well as proper training in his art.
- 9. IMPORTANCE OF THE STUDY OF ABHINAYA. It has been rightly observed that no play is more than potentially such till it is acted. Hence in order to understand a play properly one must see it produced on the stage in the manner in which the author designed it to be done. If this, however, be not possible one should at least know thoroughly that particular manner, otherwise there is every chance of misunderstanding it, in spite of sympathetic imagination or artistic taste. The Hindu plays, as far as our knowledge goes, cannot be said to have been properly appreciated by modern critics, merely because they were studied without adequate attention to the technique of their representation on the stage. Those who have made any generalisation on their value depended merely on the treatises on the literary technique of those plays

^{1.} Rāmdās Sen. op. cit., p. 93, NS. XXIV. I-II., (XXII. I-II.).

^{2.} Cf. Keith. op. cit. pp. 367-368.

(such as the Daśarūpa or the Sāhityadarpaṇa), which themselves are not fully intelligible unless they are read along with treatises on abhinaya and other branches of the prayoga-vijnāna (art of production). That this latter subject has much to do with the proper appreciation of Hindu plays has been recognized by few scholars and emphasized by none. The few stage-conventions which some of them picked out as grotesque or meaningless were a hindrance rather than a help to such an appreciation. Hence it is clear that the Hindu art of abhinaya requires to be investigated more carefully. And its practical details as well as the principles underlying them should be subjected to a most exhaustive scrutiny.

(i) Abhinaya and Painting. In the Visnudharmottara it has been said that the canons of painting are difficult to be understood without an acquaintance with the canons of dancing. This remark is not intelligible to one who is not aware of the fact that dancing includes abhinaya, and was to a great extent responsible for its origin, although in later times it came to be associated more or less exclusively with the performance of nātuas. acquaintance with abhinaya, in fact, gives the student of painting a more or less definite idea about the postures of men according to changes (physical, mental and spiritual) to which they are subjected by the different objects surrounding them. The value of a treatise on abhinaya lies in the fact that it presents to us a more or less systematic and elaborate study of the possible artistic gestures which, when reproduced on the stage by natas, may evoke rasa in the spectators. Any one who has some idea about the technique of painting will understand how the descriptions of varying gestures by head, hands, eyes, lips and feet etc., would help a student of painting to acquire skill in depicting the human form in its endless variety of poses. In fact the canons of painting such as are given in the Visnudharmottara and the Abhilasitārthacintāmani, give nothing but the anatomy of the human form considered in its motionless condition, while the canons of dancing (which includes

^{1,} Ed. Venkațesvara Press, Bombay, 1912. Part III, Ch. 2 sl. 4.

xxxi

abhinaya) consider the human form in its rhythmic movement for the purpose of evoking some rasa, and can thus verify the knowledge of that anatomy by revealing its artistic possibilities.

(ii) Abhinaya and Sculpture. The Viṣṇndharmottara¹ is also of opinion that one who does not know the canons of painting cannot be acquainted with the canons of making images. This will be clear to one who has understood the relation between painting and abhinaya given above. And a study of the AD. may be expected to remove all doubt in this matter.

^{1.} Part III. Ch. 2. In connection with rules for making images the Samarāngaṇa-sūtradhāra (vol. II. pp. 301 ff. of the GOS edition) describes the hand gestures etc., almost in the language of the NS. (IX. 4 ff.).

ABHINAYA: ITS HISTORY.

- THE ORIGIN OF ABHINAYA. Abhinaya, though closely connected with rūpakas or nātyas, is not restricted to them alone in its application. An essential part of nrtya (pantomimic dance) is abhinaya; and gītas (songs) are made perfect when they are accompanied by proper angika (physical) gestures to suggest their spirit. Hence it is natural that abhinaya apart from nātya should have its own history to which gita (song), nrtta (dance) and nrtya contributed their part. Not only the composite nature of its growth but also the different social phenomena which influenced the entire history of abhinaya should be taken into account for its proper comprehension. For instance, rituals, folk-songs, folk-dance and folk-plays contributed to the growth and development of this art as well as of nātya (drama) itself. Different masters of the art of abhinaya who flourished in the course of its long history, did also do their part in this matter; but, as at this distant date we lack adequate materials to study accurately either the relative priority or the importance of the different forces which in some way or other might have influenced the growth of abhinaya, we shall consider below only a few facts which reveal characteristics that abhinaya has in common with other social institutions, sacred or secular, as a means of suggesting the complex nature of its growth.
- (i) $G\bar{\imath}ta$ and Abhinaya. It is a well-known fact that at a certain stage of their evolution, $g\bar{\imath}ta$, (vocal music) nrta (including nrtya) and $v\bar{\imath}ulya$ (instrumental music) came very rightly to be considered not only homogeneous but also mutually dependent. The word $samg\bar{\imath}ta$ which includes these three arts and which has often been mistranslated as merely 'music' was an invention belonging to this stage. This inclusion is of help in understanding the connexion between $g\bar{\imath}ta$ and nrta (nrtya). And abhinaya, as will be seen afterwards very clearly, is connected with nrtua. Therefore, the

xxxiii

relation between $g\bar{\imath}ta$ and abhinaya becomes clear. In practice also, the same relation is to be seen even now, for Indian singers, even when they are not dancers, usually accompany their singing with gesticulation. "This is of two kinds, of which the first, quite distinct from what is spoken of in the present treatise, is a hand movement reflecting the musical form; the reflection of empathy $(s\bar{a}dh\bar{a}ran\bar{n})$ is sometimes very impressive or graceful, but not less often grotesque. The second, known as $bh\bar{a}v$ - $bat\bar{a}n\bar{a}$ or 'shewing of moods' is of the type here described as abhinaya, or 'gesture' and differs from [abhinaya] applied to Nāṭya only in the greater relative importance of the music and the words."

Nrtya and Abhinaya. The indispensable connection between *nrtya* and *abhinaya* can be gathered from Dhanañjaya's description of the former. He says nrtya is the representation of concepts conveyed by words (padārthābhinaya)². The description of Śārngadeva establishes the connexion more clearly. He says 'that which expresses bhāvas (moods) by means of āngika (gesture) is nrtya's. But according to Catura-Kallinātha, the commentator of the SR., angika in this place includes vācika as well as sāttvika abhinaya4. But there are, as will be seen later on, other factors which contribute their share to the development of natya and abhinaya, although the contribution of urtya is surely the more important. This importance will be better understood when we observe the fact that abhinaya has almost always been discussed in the works on samyīta in the chapter devoted to nṛtta (nṛtya); and works like AD. which treat only of abhinaya look to this as an art concerning solely the nartakī (dancing girl). This mode of treatment probably points to the fact that abhinaga first came to be studied and systematized in connexion with urtya, and hence the sign of that dependence even

^{1.} MG. p. 8. Words enclosed within square brackets are ours.

^{4.} Ţīkā, on SR. VII. 28.

^{5.} AD. Śl. 23b-27a.

XXXiV

in works prepared much later when it came to be largely associated with $n\overline{a}tya$.

The relation of abhinaya to nāṭya (drama) may be said to have become more intimate through the relation of the latter to nṛṭya, for the NŚ., the well-known work on nāṭya and the musical arts, clearly lays down that a play should be so written that dance can be added to it. It has also laid down the principles of employing nṛṭya in a play. It is this prescribed association of nṛṭya with Hindu plays that entitled the latter to the name nāṭya which means literally a thing to be danced or performed by a naṭa (originally a dancer, subsequently the performer of nāṭya). Indeed, it has already been mentioned that an expression like 'nāṭaham nanṛṭuh' (danced a drama) was used in the Harivamśa².

- (iii). Ritual and Abhinaya. (a). Vedic. The part which the Vedic ritual might have played in the origin of Hindu plays has been ably discussed by more than one scholar. In spite of there being no unanimity of opinion among them all, it may be said that the ritual of the Vedic age contributed, even if it might be to a small extent, to the origin of abhinaya. The testimony of the NŚ., in this connection, that nātya as a whole has sprung from the four Vedas, and that specially abhinaya can trace its origin from the Yajurveda, may not be lightly dismissed. And also the fact that the Vedic hymns, at least Sāmans, are still chanted mostly with some kind of gestures, should be remembered in this connection.
- (b). Epic Recitation and Abhinaya. The recitation or exposition of epic poems such as the $R\bar{a}m\bar{a}yana$, the $Mah\bar{a}bh\bar{a}rata$, the $Bh\bar{a}gavata$ and other $Pur\bar{a}nas$, which generally takes place on the occasion of religious festivals, has some kind of abhinaya

^{4.} NS. I. 17.

associated with it. For the Kathakas¹ just like good orators, are required to make a liberal use of gestures for impressing the audience with what they deliver. If the theory of the origin of Hindu plays from epic recitation has any weight, it is partially justified even by this single fact.

- (c). $T\bar{a}ntrik$ $Mudr\bar{a}s$ and Abhinaya. $T\bar{a}ntrik$ $mudr\bar{a}s$ (ritual gestures of the hand) have some resemblance to the manual gestures used in abhinaya. This, however, is not sufficient to allow us to suggest any clear connection of $T\bar{a}ntrik$ ritual with the origin of abhinaya.
- (d). Folk-arts and Abhinaya. Folk-songs, folk-dances and folk-plays also contain some elements of abhinaya in them. Popular ballads of ancient times may also be supposed to have been sung with some sort of crude abhinaya, and similarly folk-dances and folk-plays also were probably accompanied by this. These folk-arts can be witnessed even now-a-days in the $Gambh\bar{\nu}\bar{\nu}a$, the $G\bar{a}jan$ and the $N\bar{\nu}lap\bar{\nu}ja$ (of Bengal)² and the $R\bar{a}mal\bar{\nu}la$ (of the United Province), thus affording some material for us to arrive at their historical prototypes. The $Mah\bar{a}vrata$ ceremony of the Vedic times might be a trace of their early existence³.

11. THE DEVELOPMENT OF ABHINAYA.

(i) Before the time of Kālidāsa. Whatever might be the exact date in which abhinaya with reference to nāṭya came into vogue, it is certain that at the time of Patañjali (c. 140 B.C.) the art was largely practised. In the age that followed this art

I. Kathakas are those who read before an audience episodes from the original epics (Mbh. or R.) or the Purāṇas and explain them with the art of a good story-teller interspersing their narration with songs, or musical recitation of original Sanskrit passages.

xxxvi

made further progress, the first testimony of which is the fragments of Aśvaghoṣa's plays. This great Buddhist poet is placed by Sten Konow in about 150 A. C., but Keith is for placing him earlier¹.

In Saptasatakam (Saptasatī or Sattasai) of Hāla alias Sātavāhana $n\bar{a}daa$ ($n\bar{a}taka$) and $p\bar{u}vvaramga$ ($p\bar{u}rvara\dot{n}ga$) are mentioned side by side². The word pūrvaranga, being a technical word connected with the production of a nātya on the stage, shows that the art of abhinaya was at that time in a more advanced stage than in the age of Patañjali. As for the date of Hāla, Winternitz says that he must have reigned either in 1st or 2nd century A.C., though Weber is for placing his 300 A.C., at the earliest³. Avadānašataka, a anthology in Sanskrit Buddhist work describes the performance of a Buddhist $n\bar{a}tuka$. The description of the $n\bar{a}tuka$ in that work is enough to show that the age which produced the work witnessed considerable development of the art of abhinaya. The mention of the word 'natācārya' in the sense of master-nata or the professor who trained the natas (and was consequently the director of a party of natas), gives us good reason to presume that the art of a nata had by that time became important enough in the eyes of the people to accord to its teacher the venerable title of $\bar{a}e\bar{a}rya$ —a title generally given to masters of sacred things like the Vedas and the Vedangas, etc. This Avadānasataka is a work considered to have been written between 200 A.C. and 253 A.C.

More copious references to abhinaya is to be found in the $Harivam\hat{s}a^s$. The word abhinaya with its derivatives has been used in it nearly a dozen times. This fact together with

^{5.} II. 92-93.

the mention of technical words like nāmlī, nepathya, and vidnṣaka gives us ample ground to presume that the work was written at a time when the art of abhinaya reached a high degree of development. The lower limit of the date of the Hariramṣa varies between 200 A.C. and 400 A.C.. There should, however, be no objection in placing the work in the second century, for the Bhāsa-plays have been assigned to an age between 300 A.C. and 350 A.C. by Winternitz², and Aśvaghoṣa to a period between 100 B.C. and 200 A.C.

(ii) At the age of Kālidāsa. The improvement made by Kālidāsa in the existing plays of his time consisted in assigning a more or less prominent place to song and dance. In this respect he probably made a departure from the style of his predecessors. It is quite likely that in the beginning Kālidāsa with this innovation was rather afraid of the admirers of old masters like Bhāsa, Saumilla and others; hence, in spite of the firm self-reliance which always characterizes a great genius, he uses song and dance very cautiously in the Mālavikāgnimitra and the Śakuntalā. The success of these two, especially of the Śakuntalā, which must have raised him in the estimation of his contemporaries, convinced him of the fitness of his method, which he applied more freely in the Vikramorvašī—probably his last play³ the proper production of which would enable one to see the best specimen of the art of abhinaya.

The value of Kālidāsa's innovation from the standpoint of the art of abhinaya is immense. Hindu plays—poems in their conception and lyrical in their character—became after him a unique spectacle in which the lyrical element was given the fullest predominance by the scope given to song and dance.

^{3.} Hillebrandt, Kālidāsa. Breslau, 1921, p. 87. Ryder—Sakuntala Everyman's Library Ed. p. 115.

- (iii) After Kālidāsa. The art of abhinaya does not seem to have made much advance after Kālidāsa. For the plays of post-Kālidāsian age are composed more or less after the manner of that great genius. But it is sure that from time to time gestures were studied afresh, new gestures were added to their number, and sometimes the old ones also were slightly modified. All these we below under the literature on abhinaya.
- 12. THE LITERATURE ON ABHINAYA. The treatise on abhinaya which can be called the earliest is, the Naṭasūtra of Śilālin and Kṛśāśva mentioned by Pāṇini (c 500 B. C.). We do not exactly know what it contained, but if any conjecture on the subject is allowable, we may presume in the light of a study of the later works on nṛṭya and abhinaya that Śilālin's and Kṛśāśva's work contained among other things a description—probably classified—of gestures and postures etc., and where and how the naṭa was to use them.

Nandikeśvara's Bharatārṇava (BhA), of which we know only the name, was perhaps the next work on the art of abhinaya. The AD. which, according to one tradition (see §2), is an abridgment of this work was undoubtedly written long after. Reasons for these assumptions will be discussed later on.

The Bharata- $N\bar{a}tya\acute{s}\bar{a}stra$ which among other things treats of abhinaya is thus the earliest available work dealing with the subject. It has sometimes been assumed that the NŚ. in its earliest form was a $s\bar{u}tra$ -text—meaning by the term a work consisting of highly compressed prose formulae such as the $Ast\bar{a}dhy\bar{a}y\bar{\imath}$ of Pāṇini. If such actually existed it might have been earlier than the BhA. which, as its abridgement shows, was in all probability a versified work.¹ But we are afraid that the above assumption is based on a very weak foundation. Though the NŚ. has often been referred to as the $N\bar{a}tya-s\bar{u}tra$ and its author the Bharatamuni of dubious existence has been called the $s\bar{u}trak\bar{a}ra$, it is highly doubtful if anything except the present NŚ. written in metres or its prototype of a like nature ever

^{1.} Cf. S. K. De, Sanskrit Poetics, Vol. I. p. 29.

existed. A careful examination of the word sūtra will support this view. It is on the basis of this word and of the word $k\bar{a}xik\bar{a}$. occurring in the text of the $N\acute{S}$ ($VI,\,11.\,31$) that one makes above assumption. As the meaning of the word $k\bar{a}rik\bar{a}$ is quite plain we are to discuss only the meaning of the word $s\overline{u}tra$. It is generally believed, and perhaps very firmly, that this word means a work containing highly compressed prose formulae on any subject such as the Astādhyāyī or the Brahma-An authority like Abhinavagupta deals a cruel blow to such a belief. In his comments on NS. VI. 11. 31, he is not for distinguishing between $k\bar{a}rik\bar{a}$ and the $s\bar{u}tra$. In the mangalācaraņa of the Abhinava-bhāratī he has named the very NŚ. the Bharata- $s\,\bar{u}\,t\,r\,a$. Together with this fact one should remember that the Rk-prātišākhya written in prose and verse has been called the $P\bar{a}rsada-s\bar{u}tra$. This also is noteworthy that the Southern Buddhists called their scriptures (written in prolix prose) $suttas (= s\bar{u}tras)$ and the Northern Buddhists too call some of their metrical treatises sūtras (e.g., the Madhyānta-vibhāga $s\bar{u}tra$ of Maitreyanātha¹). The $s\bar{u}tra$ (thread) which runs through jewels or flowers in a garland seems to have led to a metaphorical use of the word. Hence sūtra means merely the inner or central principles or essential rules. On taking this view of the meaning of the word sūtra we may consider the NŚ. (in metre) to be the earliest available work on abhinaya.

Then come the Agnipurāṇa and the Viṣṇudharmottara, which make room for a treatment of abhinaya in their body. The date of the Viṣṇudharmottara has not been critically discussed by any authority but it may be that this work belongs to a period not later than 500 A. C.². And the Agnipurāna has been placed in the latter half of the 8th century³.

^{1.} Principal Vidhushekhara Bhattacharya of Visvabharati, Santiniketan has kindly drawn my attention to this fact. The *Madhyānta-vibhāga-sūtra-bhāsya-ṭīkā* edited by him in collaboration with Prof. G. Tucci of Rome has been published in the Calcutta Oriental Series (No. 24).

^{3.} S. K. De, op. cil. p. 103.

ABHINAYADARPANA

- 13. SCOPE OF THE WORK. The AD. treats in details the $\bar{a}igika$ abhinaya which includes gestures, postures and movements dependent on feet. The exclusive attention paid to the $\bar{a}igika$ abhinaya is due to its importance with reference to the training of the natus and natus who are to perform the $n\bar{a}tya$ and natus. The same importance may be said to have been recognized by Amarasimha the famous lexicographer, for he mentions in his Kosa only $\bar{a}igika$ abhinaya and the $s\bar{a}ttvika$, primarily dependent on the former².
- (i) Gestures. To understand the proper value of gestures which furnish the basis of the angika abhinaya one should observe their application in other departments of social activities. are first met with in the languages of primitive people. It is sure that they played an important role in the evolution of human speech. A gesture language is used by mutes and even by others when they meet persons speaking a language unintelligible to them. And often it so happens that some ideas cannot be adequately expressed or explained without some gesticulation accompanying words spoken. This clearly shows the power of suggestion that is inherent in gestures. It is no wonder, therefore, that they were combined with dance—the first born among arts of mankind—and have been endowed with rhythm to call forth rasa in persons witnessing dance. But they have other uses besides this. The ritualistic use of gestures known as mudrās is an instance of it. Sādhakas (devotees) of the Tantrik school use them. According to some they are meant to emphasize and intensify their thought, and thus

^{1.} Cambodian dancers who owe their art to ancient India still learn this with great pain. See, the Gestures in the Cambodian Ballet by J. Cuisinier in 'Indian Art & Letters', 2nd issue for 1927.

^{2.} See the Amarakosa on 'abhinaya'.

giving them the bliss (mml) of meditation. But gestures used in abhinaya and nrtya differ from $mmlr\bar{a}$. And nrtya and abhinaya also have different principles of utilizing them. For in nrtya gestures are used by themselves whereas in $n\bar{a}tya$ they are used in accompaniment of words, to suggest their meaning.

But whatever might be the difference of principle regarding the application of gestures in urtya, abhinaya and mudrā they agree in one respect: in all those cases they tend often to be artistic and symbolical, rather than natural and simple. After the introductory matters (1—48) the AD, treats the following gestures:—

- 1. Nine gestures of the head (49—65).
- 2. Eight gestures of eyes (66-79).
- 3. Four gestures of the neck (79—87).
- 4. Twenty-eight gestures by one hand (87—165) and four such additional gestures (166—172).
 - 5. Twenty-three gestures by both the hands (172—203).
 - 6. Gestures for representing gods (204—215).
- 7. Gestures for representing the ten Avatāras of Viṣṇu (216-225).
 - 8. Gestures for representing different castes etc. (226-231).
 - 9. Gestures for representing various relations (231—244).
- 10. Gestures of hand for dance in general, and the method of moving hands in dance (244—249).
 - 11. Gestures for representing nine planetary deities (250—258).
- (ii) Postures and gatit. After treating gestures the AD. treats of postures and various movements of the body depending principally on feet (sl. 259ff.). It is a plain fact that the carriage of

^{1.} Sir John Woodroffe, The Philosophy of Hindu Rituals in 'Indian Art and Letters' 1925, p. 78. Because of an association of these mudrās with the Tāntrik mode of worship they have been called 'Tāntrik' (vide § 10, iii, c). They are to be distinguished from the mudrās of the pañcatattva.

the body and its various movements often characterize a person. On assuming this the theorists of the art of *abhinaya* have codified postures, and movements of the body depending on feet.

- 1. Mandalas and $sth\bar{a}nakas$ or sixteen modes of standing and sitting (260—282).
- 2. Utplavanas or five kinds of jump-like movements (282—289).
 - 3. Bhramaris or seven kinds of spiral movements (289-298).
 - 4. Cārīs and gatis or eighteen kinds of gait (298—332).

One peculiarity is noticed in the treatment of the above items. Unlike the gestures, the definitions of various postures (except in the case of $sth\bar{a}nakas$) and feet-movements are not accompanied by their viniyoga (application). An explanation of this fact is available at the end of AD. in the following terms:—

मण्डलानि प्रयुक्तानि तथैवोत्ष्लवनानि च ॥ ३२२ ॥ भ्रमर्थश्चेव चार्यश्च गतयश्च परस्परम् । एकैकभेदसम्बन्धादनन्तानि भवन्ति हि ॥ ३२३ ॥ एताश्च नर्तनविधौ शास्त्रतः सम्प्रदायतः । सतामनुग्रहेणैव विज्ञेया नान्यथा भुवि ॥ ३२४ ॥

'Mandalas, Utplavanas, Bhramaris, Cāris and Gatis according to their relation to one another are endless in number and variety. Their uses in dance and drama are to be learnt from the śāstra, tradition of the school and through the favour of good people and not otherwise'. This probably shows that at a time when the AD. was compiled the uses already recorded in case of the above movements depended solely on the principles known to teachers and not on any written work. Probably for this reason we do not get them in writing in the AD., which carries a very early tradition.

14. THE ABHINAYADARPANA AND THE BHARATA-NĀṬYA-ŚĀSTRA. Bharata-Śastra (not the Bharata-Nāṭya-śāstra) has been many times referred to as an authority in the AD., and the extant NŚ. in its chapters VIII—XI, treats of the

āngika abhinaya (gestures). Hence a comparison of the two works becomes necessary.

(i) Head-gesture. According to the NŚ. (ch. viii) there are thirteen gestures of head while Nandikeśvara has only nine. Among them five gestures have common names in both the works; besides this, the names of two gestures agree partially. The names of all these gestures with their definitions and application in both the works are given below.

AD.: सम, उद्घाहित, अधोमुख, आलोलित, धुत, कम्पित, परावृत्त, उत्क्षिप्त, परिवाहित. NŚ. (ch. viii): आकम्पित, कम्पित, धुत, विधुत, ध्रिपरिवाहित, आधुत, अवधुत, अञ्चित, निहञ्चित, परावृत्त, उत्क्षिप्त, अधोगत, लोलित.

अधोमुख— AD. अधस्तान्नमितं वक्त्मधोमुखमितीरितम् । ल जा । खे द प्र णा मे खु दुश्चिन्तामूर्ळयोस्तथा ॥ ९४ ॥ अधःस्थितार्थनिर्देशे युज्यतेऽम्बुनिमजने ।

अधोगत— NS. अधोमुखं स्थितं चापि शिरः प्राहुरधोगतम् । छजायां च प्रणामे चद्वः खेचाधोगतं भवेत् ॥ ३४॥

A comparison of the names, definitions and viniyogas (applications) of the head gestures in the two works shows that the gestures named Adhomukha, $\bar{A}lolita$, (= Lolita) Dhuta, Kampita, $Par\bar{a}vrta$ and $Pariv\bar{a}hita$ are defined in each work in a similar manner. As regards their applications also the two works have a considerable agreement which has been pointed out by using spaced types in texts quoted above; besides this, the definition of the gesture $Udv\bar{a}hita$ in the AD, agrees substantially with the Utksipta of the NŚ.

- (ii) Eye-gestures. According to the NS. (Ch. VIII. 101ff), there are three classes of eye-gestures, such as, (a) eyes for expressing eight rasas, (b) eyes for expressing $sth\bar{a}yi-bh\bar{a}vas$, and (c) eyes for expressing $sa\bar{n}c\bar{a}ri-bh\bar{a}vas$. Each of the classes (a) and (b) in their turn has eight varieties, while the class (c) has twenty varieties. But the AD. (66ff.), is not so elaborate in its classification or division of these gestures. It enumerates only eight kinds of them. The classification in the two works has not any common name.
- (iii) Neck-gestures. The NŚ. (Ch. VIII. 164ff.), enumerates nine kinds of these gestures while the AD. (79ff.), gives four kinds of them. The two enumerations possess no common names.
- (iv). Hand-gestures. Though the NS. and AD. agree in classifying the hand gestures into (a) single hand (asamyuta-hasta) and (b) combined hand (samyuta-hasta) and (c) hand-gestures for dance (nrtta-hasta), and these three classes possess many common names, yet they differ as regards the number of gestures in each class as well as in their definition and application. Let us consider them separately.
- (a) Single-hand gestures: According to the NŚ. (Ch. IX), there are twenty-four gestures in this class, while in the AD., their

^{1.} The Kāvyamālā text omits this verse.

number is twenty-eight. In both the works twenty-two gestures have common names. Their description and application too in the two works have considerable agreement. Relevant texts from both the works have been quoted below. Points of similarity in their application have been pointed out by the use of spaced types.

अङ्गुलयः कुञ्चिताङ्गुष्ठाः संश्विष्टाः प्रसृता यदि । AD. पताक---स पताककरः प्रोक्तः नत्यकर्मविशारदैः ॥ ९३ ॥ नाट्यारम्भे वा रिवा हे वने वस्तुनिषेधने। कचस्थले निशायां च नद्याममरमण्डले ॥ ९४ ॥ तरके खण्डने वायौ शयने गमनोद्यमे । प्रता पे च प्रसादे च चन्द्रिकायां घनातपे ॥ ९५॥ कवाटपाटने सप्तविभक्तयर्थे तरङ्के । वीथीप्रवेशभावेऽपि समत्वे चाङ्गरागके ॥ ९६ ॥ आत्मार्थे शपथे चापि तुर्ष्णांभावनिदर्शने । तालपन्ने च खेटे च हन्याहिस्पर्शने तथा ॥ ९७ ॥ आशीर्वादक्रियायां च नपश्रेष्टस्य भावने । तन्न तन्नेतिचचने सिन्धो च स्कृतिक्रमे ॥ ९८ ॥ सम्बोधने पुरोगेऽपि खड्गरूपस्य धारणे। मासे संवत्सरे वर्षदिने सम्मार्जने तथा ॥ ९९॥ एवमर्थेषु युज्यन्ते पताकहरूतभावनाः ।

^{1.} Some texts add one more couplet.

The comparison yields these facts:-

1. The definition of the following thirteen gestures is similar in substance in both the works:

Patāka, Tripatāka, Ardhacandra, Arāla, Śukatuṇḍa, Muṣṭi, Śikhara, Padmakoṣa, Sarpaśiras, Mṛyaśīrṣa, Catura, Bhramara, Mukula.

2. The following gestures have some points of agreement as regards their application. The number of those points varies in each case and it has been noted against the name of each gesture mentioned below. These points have been shown with spaced types in the quotations given above.

Patāka (2), Tripatāka (2), Ardhacandra (1), Muṣṭi (1), Kaṭakāmukha (4), Padmakośa (3), Sarpaśiras (5), Mukula (2).

- 3. Except in the cases mentioned in (ii) above the *viniyoga* of the gestures vary in the two works.
- 4. The definitions of the following gestures vary in both the works: Kartarīmukha, Kaṭakāmukha, Kaṇittha, Sūcī, Kāṇgula, Alapadna (Alapallava), Haṃsapakṣa, Sandaṃśa, Tāmracūda.
- 5. The following gestures of the NŚ., are subdivided according to their *viniyogas* and special instructions have been given as to how a gesture is to be used in different groups of things.

Patāka, Tripatāka, Arāla, Sūcīmukha, Catura, Saulamśa.

- (b) Combined-hand yestures. The NS. (Ch. IX), names thirteen gestures of this class, while the AD., gives twenty-three. The two classifications have eight common names. They are compared below:
- अञ्जिलि AD. पताकातलयोर्योगादञ्जलिः कर ईरितः। दे व ता गुरु विप्राणा न म स्कारे व्वतुकसात्।। १७६॥ कार्यः शिरो मुखोरस्थो बिनियोगेऽञ्जलिबंधैः॥
 - NS. पताकाभ्यां तु हस्ताभ्यां संश्लेषादञ्जलिः स्मृतः । देव ता नां गुरूणां च मित्राणां चा मि वा द ने ॥ १२२ ॥

देवतानां शि र स्थस्तु गुरूणामा स्य-संस्थितः । बक्षःस्थश्रेव मित्राणां स्त्रीणां कार्यो यथेप्सितः ॥ १२३ ॥

कपोत — AD. कपोतोऽसौ करो यत्र श्लिष्टाऽऽमूलाग्रपार्श्वकः ॥ १७७ ॥ प्रणा मे गुरु स म्भा पे विनयाङ्गीकृतेऽवयम् ॥

NSं उभाभ्यामांपे हस्ताभ्यामन्योन्यं पार्श्वसंग्रहात् ।
हस्तः कपोतको नाम कर्म चास्य निवोधतः॥ १२४ ॥
एषोऽभिनयाभिगमे प्रणा म कर णे गुरो श्र सं भा षे ।
शीते भये च कार्यो वक्षःस्थः कल्पितः स्त्रीभिः ॥ १२५ ॥
अयमेवाङ्गुलिपरिष्ण्यमाणमुक्तस्तु खिन्नवाक्येषु ।
एतावदिति(च) कार्यो भेदाङ्गी(नेदानीं) कृत्यमिति वाथ(चार्ये) ॥ १२६ ॥

कर्बट — AD. अन्योन्यस्यान्तरे यन्नाङ्गुल्यो निःस्तय हस्तयोः ॥ १७८ ॥ अन्तर्बिह्वां वर्तन्ते कर्कटः सोऽभिधीयते ॥ समुह्णामने तुन्ददर्शने श ह्व पूरणे ॥ १७९ ॥ अङ्गानां मोटने शाखोन्नमने च नियुज्यते ।

As a result of the comparison of the combined-hand gestures named similarly in the two works, we have the following facts:

1. The following gestures in both the works have substantially the same definitions, and their applications also agree mutually to a great extent:

Anjali, Kapota, Karkata and Puspaputa.

2. The gesture named Puspapuṭa is almost similarly defined in both the works.

- 3. The remaining three gestures are differently defined and applied in the two works.
- (c) Netta-hastas. According to the NŚ. (Ch. IX. 173ff.), they are twenty-seven in number and different from the single-hand and combined-hand gestures. But their number in the AD., is thirteen and they are not anything different from the single or combined-hand gestures; for, six of them (Patāka, Tripatāka, Śikhara, Kapittha, Alapadma and Ilaṃsāsya) are the same as the single-hand gestures of the same name and the remaining seven (Anjali, Svastika, Dolā, Kaṭakā-vardhana, Śakaṭa, Pāśa and Kūlaka) are the same as the combined-hand gestures of the same name. Thus, whatever might be the number of gestures in each group, the total number of hand-gestures are sixty-four according to the NŚ., and fifty-one according to the AD.
- (v) $C\bar{a}r\bar{\imath}s$. According to the NŚ. $c\bar{a}r\bar{\imath}s^{\imath}$ are thirty-two in number and are divided into two classes: (a) earthly (bhanna) and (b) heavenly ($\bar{a}k\bar{a}\hat{s}aq\bar{a}m\bar{\imath}$). But the AD, has only eight $c\bar{a}r\bar{\imath}s$ and they constitute only one class by themselves. The two works have no name common in their $c\bar{a}r\bar{\imath}s$.
- (vi) Mandalas. According to the NŚ., $mandalas^2$ are twenty in number and are divided into two classes: (a) earthly (bhauma) and (b) heavenly ($\bar{a}k\bar{a}sika$), but the AD., gives only ten of them and does not classify them at all. The two works have no common names in their mandalas.
- 15. THE ABHINAYADARPANA AND THE BHARATĀRNAVA: Both these works are ascribed to Nandi-keśvara, and the authors of the two works may be identical. The tradition recorded in the opening verses of the text used for the MG., says that the AD. (vide notes on \$1.1), is an abridgement of the BhA. But nothing like this is to be found in any of the five manuscripts collated for the present edition. Hence in the

^{1.} See NS. XI. 1ff.

^{2.} See NS. XI. 4.

beginning we disbelieved it. However, being informed that a manuscript named the BhA., exists in the Library of Bhandarkar Oriental Institute, Poona, we procured a loan of it for placing our conclusion on a surer basis. This led to a thorough examination of the same work, which treats of abhinaya as well as nytya. And the following are the results:

The Poona MS, of the so-called BhA, which we have called P. (*ridr* p. xix.) appears, on the following grounds, to be a different work or at best a recasting of the old work of the same name.

(i) In the body of the work occurs the śloka—

आलापवारां(रीं) वक्ष्येहं देशीपद्धतिमाश्रिताम् । भरतार्णवसामन्थ्य स्थामिव समुद्धृतम् ॥ (f. 4)1

From this it appears that the work frankly draws its material from the BhA.; but the word Bharatārṇava here may be explained away as meaning 'the ocean of the so-called Bharata's śāstru.

- (ii) At the beginning of its treatment of $l\bar{a}sya$, which according to it is of seven kinds, it gives a superscription as $nandibharatokta saptal\bar{a}sya-lakṣaṇam(f.7)$. This probably points to the nature of the work as a compilation which depended on Nandikeśvara as well as the so-called Bharata i.e., his $\hat{s}\bar{a}stra$.
- (iii) In treating of certain kinds of $t\bar{a}ndaras$ this work has the following sloka—

वक्ष्ये निकुन्नितादीनां ताण्डवानां यथाक्रमम् । मतान्तरं समास्रोक्य रुक्षणं पूर्वसम्मतम् ॥ (f. 9)

This may be said to point to the fact that this work, different from the so-called BhA., is a compilation from various sources.

(iv) At the beginning of its chapter on miscellaneous handgestures it has the superscription nandibharatokta saṃkīrṇādhyāyah

^{1.} Folia cited in this quotation and the following five refer to P. or the Poona MS, of the so-called BhA. (see p. xix.).

- (f. 34). This also adds to one's doubt as to the so-called BhA, being the original work of Nandikesvara and shows that it is a compilation which depended on his work as well as that of the so-called Bharata.
- (v) At the end of the chapter referred to in (iv) it writes 'भरतार्थचन्द्रिकायां भूधरराजद्वहितृरचितायाम् । नानार्थमुद्रहस्तो छमते बहुविधोऽस्ति तन्न संक्षिसम् ॥' and the colophon, which follows this, is 'इति श्रीनन्दिकेश्वर-विरचितपार्वतीप्रयुक्तभरतार्थचन्द्रिका (यां ?) नानार्थप्रकरणं समाप्तमासीत्' (f. 42).

Read together with the superscription (nandibharatokta saṃ-krṛādhyāyaḥ) at the head of this section, the above colophon effers a puzzle and again adds to our doubt as to the so-called BhA., being identical with Nandikeśvara's work of the same name. It may be altogether a different work of the name of the Bharatārtha-candrikā depending on Nandikeśvara as well as the so-called Bharata for its material.

(vi) The colophon at the end of its chapter on samyutu-hustus runs as इति नन्दिकेश्वरिचिते भरतार्णवे छमतिबोधके स्युतहस्तप्रकरणं नाम द्वितीयोऽध्यायः.

This, however, gives the name of the work as the BhA. The discoverer of the MS., it is sure, depended on this only in labelling the work as the BhA. These various ways of describing the work probably shows it to be something other than the original work of Nandikesyara.

P. resembles to a great extent the AD., in its treatment of hand gestures of the first two kinds (asanyuta and sanyuta-hastas). The number of asanyuta-hastas (single-hand gestures) is twenty-eight in the AD., whereas their number is twenty-seven in the P. Of these, twenty-six gestures have similar definition and description in both the works. The number of sanyuta-hastas (combined-hand gestures) in the AD., is twenty-three while in the P. their number is sixteen. Of these, seven have common names in the two works, and the definition and application of six only have a substantial agreement in the both.

But the treatment of *nrtta-hastas* in the P., is different from that of the AD. Unlike the AD., the P. describes a new set of hand-gestures called *nrtta-hastas*. In this matter the latter work bears resemblance to the extant NŚ., (*vide* p. lxi). The number of *nrtta-hastas* are sixteen in the P., whereas their number is no less than twenty-seven in the NŚ. Of these, twelve common names are found in both the works but their definitions and applications differ.

16. THE ABHINAYADARPANA AND THE SAM-GĪTARATNĀKARA. The SR., being evidently a work posterior in date to the AD., it is not necessary to compare the two. It goes without saying that SR., which was compiled from various sources such as the NŚ. and AD., has treated gestures etc., more elaborately (vile Ch. VII. of SR.). But it should be mentioned that the author of the SR., has from time to time retained the very language of the source-books. The following is a table showing the passages quoted from the AD., in the SR. (Ch. VII):

AD.		SR.	AD.		SR.
12	•••	1	58(i)	• • •	55(i)
2-12(i)	•••	4-12	58(ii)	•••	56(ii)
12(ii)-14	1-	4(ii)-16	61(ii)		72(i)
38(ii)-39(i)		21	62(i)	•••	72(ii)
39(ii)-40(i)		22	100(ii)	•••	111(i)
40(ii)		23	135(i)	•••	145(i)
42(ii)-43(i)	• • •	40	176(i)-177(ii)	•••	187
43(ii)-44	•••	41	178(i)	•••	189(ii)
45(ii)-46(i)	•••	42	178(ii)	•••	190(i)
46(ii)-47(i)	•••	43	179(i)	•••	190(ii)
56(i)	•••	75(ii)			

^{1.} See the treatment of the nitta-hastas in the NN. (Ch. 173ff.)

^{2.} Numerals refer to no. of verses; and (i) and (ii) indicate respectively the first and the second half of the verses.

Besides the above, the SR., in other cases too bear clear evidence of an influence of the AD.

17. THE STYLE AND METHOD OF TREATMENT OF THE AD. The present work is written in a simple style. It is even simpler than the chapters which the NŚ., devoted to write and abhinaya. There are some grammatical anomalies and stock phrases like kīrtitah pārvasāri hih, negate nātgakovidaih, proktah nātga-karmavišāradaih are very often used for filling up the verse i.e., for pādapāraņa.

Nandikeśvara's method of treatment in the AD., is analytical. He considers the gestures of different limbs separately, though in actual abhinaya some of the limbs cannot have independent movement. And moreover the gesture of one single limb is never used, except for a short time, to the exclusion of the rest. In the NŚ., the synthetic method has been combined with the analytical one. For, in it we find not only the enumeration of the gestures of different limbs but also their combination in the form of karanas and anguhāras.

18. THE AUTHOR OF THE WORK. It is almost impossible to say anything with certainty about the life and times of Nandikeśvara, the reputed author of the AD. This name has been found not only in connexion with abhinaya but also in relation to works on various other subjects, such as, Tāla, Rasa, Yoga, Tantra, Kāma-śāstra, Pūrva-Mīmāṃsā and Liṅgāyet Saivism. The three works named Tāla-lakṣaṇa*, Tālādi-lakṣaṇa and Tālābhinayalakṣaṇa have been ascribed to N. Rājaśekhara in his Kāvya-mīmāṃsā cites one N., as a writer on Rasa. There is a work named Yoga-tārāvali* from the hands of one N. The

Nandikeśvara-tilaka¹ has N. frankly as its eponymous author. The Pañcasāyaka mentions this name as a writer on the Kāma-śāstra, and Vātsyāyana, too, in his sūtra refers to one Nandī whom Aufrecht is inclined to identify with N. The Prabhākara-vijaya² a Pūrva-Mīmāṃsā work has also one N., as its author. Besides this, the author of the Lingalhāraṇa-candrikā³ a work on Lingāyet Saivism is N. Surely we cannot see a single person in all these Nandikeśvaras. But it is probable that N., in connexion with tāla, and abhinaya was a single person, and as such was different from the writers on Yoga, Tantra and Pūrva-Mīmāṃsā.

The testimony of Sārngadeva, the author of the SR., which quotes passages from the AD., seems to corroborate the first part of the above view; for, according to him N. was an authority on samqīta, that is, he made some contribution to the art which includes tāla and abhinaya. It is difficult to say whether N., the writer on ars amatoria was identical with the writer on sampita of the same name. But if the Chapter XXII of the NS., dealing with erotical topics can be considered an integral part of the original work one can say that the identity of the two authors is not at all improbable. However, any decision on the point being very uncertain we shall consider here N., merely as a writer on samgīta, and as such he was a mortal human being and not the god of the same name, with whom popular imagination in course of time tended to identify him. He might, however, have been a follower of Siva. The problem how or why he came to be regarded as a deity is rather a difficult one; but it may be given one explanation. To persons who came long after a teacher, who established a tradition, or organised a religious sect, the latter was something like a superhuman personality. Hence they gradually discovered in him a semi-divine or divine being and created appropriate legends to substantiate that character. In the case of N..

^{2.} TCM. vol. IV. Pt. I. p. 4909.

^{3.} TCM. vol. IV. Pt. I. (no. 3433).

the process was probably facilitated because the Puranic N, was associated with Siva who was so much in love with dance and $n\bar{a}tya$.

An account of the *Lingapurāṇa* shows that Nandikeśvara the attendant of Śiva¹ was originally a mortal—the son of a blind woman named Śilāda² who prayed to gods for an immortal son and was given by Śiva a son named Nandī. This Nandī came afterward to be known as Nandikeśvara and was immortalized by Śiva as the chief of his *gaṇas*.

Mm. Ramakrishna Kavi identifies Nandin or Nandikeśvara with Taṇḍu. According to him N. was the author of Nandīśvara-saṃhitā, the whole of which work is extinct now except a chapter on histrionics³, and this chapter on histrionics is probably the AD. In the absence of sufficient proof in support of this statement we may consider this as a mere suggestion based on similarity of names.

- 19. THE PLACE OF NANDIKEŚVARA. The god named Nandikeśvara being popular in some parts of the Southern India, our author of the same name seems to have been an inhabitant of that part of the country.
- 20. THE TIME OF NANDIKEŚVARA. If the suggestion of Mm. Ramakrishna Kavi who identifies N. with the author of Nandīśvara-saṃhitā, can be accepted, a guess may be made about the date of our author. For, N. is quoted by Matanga, a writer on saṃgīta, and may probably be anterior to the latter by nearly a century. The date of Matanga can be roughly fixed.

^{1.} Gopinath Rao, Elements of Hindu Iconography, Vol. II. part I p. 455-459.

^{2.} Has the Śilāda any connexion with Śilālin meaning 'naṭa' Śilālin = Śilāla +in, and (?)Śilāla <*Śilāla <*Śilāla <*Śilāda.

^{3.} The Quarterly Journal of the Andhra Hist. Research Society—Vol. III. pp. 25-26. Nandīśvara-saṃhitā like the Manu-samhitā may hav been the work of an author other than Nandikeśvara.

for, he is mentioned in the Tamil work named Silappadikarana which has been assigned to the 4th century A.C. Hence, Matanga who was more or less a century earlier than the writer of the Tamil work, can be placed in the third century. This gives the date of N., who was perhaps a century earlier than Matanga, as the second century A.C.

21. THE ANTIQUITY OF THE WORK. The AD. is said to be an abridgement of the BhA., of the exact nature of which we practically know nothing. And besides this there is the Namlisrara-samhitā which probably claims the AD., as one of its chapter. Hence, the work in the present state of our knowledge cannot be placed as early as the 200 A.C., the probable time for N.

Lack of sufficient materials has made the determination of the date of the AD., a very difficult problem of the history of the NŚ. literature. We shall, however, attempt to give below our reasons for a tentative date on the basis of available materials.

The lower limit to the date is to be had from the SR., a work written between 1210 A.C. and 1247 A.C.²

There are passages common to the AD. and the SR.³ The fact that the SR., mentioned the name of N. as one of the authorities on samgīta gives one occasion to presume that Śārṅgadeva the author of the SR., knew works like the AD., $T\bar{a}l\bar{a}hhinayalakṣaṇa$, $T\bar{a}lalakṣaṇa$ or $T\bar{a}l\bar{a}hilakṣaṇa$, and $Bharat\bar{a}rṇava$ ascribed to N., and quoted from some of them. Hence, in the present case SR. appears to be the borrower from the AD. The opposite possibility seems to be non-existent on the following grounds.

It has been shown above that the treatment of gestures in the $N\dot{S}$, are partially different from the $\dot{A}D$, and more elaborate.

I. Ibid p. 24.

^{2.} Preface (p. 3) of the Anandasrama ed. of the SR.

² They have been nointed out before in a dviv

And the treatment of these in the SR is more or less in conformity with that of the NS, though the former has made its classification more elaborate. Thus in their treatment of gestures the AD and SR may be said to have slight agreement. But SR, in its treatment of cārīs, sthānas (or sthānakas) and mandalas are quite different from that of the AD, which is less elaborate or, in other words, less developed. In view of these facts it does not appear probable that a work partially compiled from a later treatise like the SR, will be passed off in the name of an ancient master like N, whom the author of the SR (ch. I. 17), had to recognize as one of the authorities.

To ascertain the upper limit to the date of the AD., is, however, a comparatively difficult task. The only light which we may have in this matter is from the NŚ., which also treats of gestures in its chapters VIII-XII. As we have noticed before, the treatment of the gestures of head and hand in the NŚ., bears some resemblance to that of the AD. Now, what may be the reason of such a resemblance? An attempt to answer this question suggests the three following alternatives:

- 1. the AD, is indebted to the NS, or
- 2. the NS. is indebted to the AD., or
- 3. these two works are indebted to a common source.

For convenience' sake, let us discuss the first two of the alternatives together. It appears, on the following grounds, that the AD. has not borrowed things from the NS.

- (a) The classification of the gestures of head and hand in the NS, is more developed than that of the AD.
- (b) Instances in which these gestures can be used are also more numerous in the NŚ.

One, however, cannot be sure on this point. Though the general tendency of such things are towards development, it will be nothing extraordinary if one assumes that the AD. might be the abridgement of an over-elaborated treatise. Indeed-

there is a story that the AD. is an abridgement of the BhA., the exact nature of which we do not know. So there may be a chance that the AD. might be the borrower in this case. the BhA. has been ascribed to N. himself, and, besides this, there exists some dissimilarity in the two works as regards the application of the gestures which have substantially identical definitions. Besides this, the two works at times follow separate traditions of their own. (vide. p. lx and notes on sl. 15 and 35.) These two facts taken together makes one highly sceptic about the existence of such a possibility. This brings us to the second alternative, viz., the possibility of the NS., being the borrower. The comparative elaboration of the classification of head and hand gestures probably points to such a direction. The difference in the application of the common gestures may again be cited here to the detriment of this theory. But one may explain away this difficulty by suggesting that the NS., being a later work improved upon the things borrowed. This improvement can be noticed not only in an increase of the number and variety of gestures but also in the modification of the application of certain gestures which such an increase entailed. Instances of such improvement made on things, borrowed from earlier works, are not rare in the later Sanskrit literature. For example, the SR., which is unquestionably a work later than the NS., has closely followed the NS., in its section on gestures, but at the same time it has added to the number of gestures given in the latter work, and has modified the uses of some of them. A study of the development of the number and variety of alamkāras will also reveal the same fact. The four alamkāras of the NS, increased in some of the latter-day treatises on Sanskrit poetics to almost four dozen. The increase of the number of $n\bar{a}yakas$ which was four according to the NS, to sixteen in the Dasarūpa is also another fact of the same nature,

The above explanation gives us room for presumption that the source of the AD. might be earlier than the extant NŚ, at least its chapters VIII and IX. And it cannot be said that there is no chance of this NŚ, being a borrower from the work of N. Indeed

we have something like an evidence of this borrowing of the NŚ, (from the Nandin's work) in the shape of the colophon at the end of the Kāvyamālā edition of the NŚ, which reads as 'samāptu-ścāyaṃ(?) nandibharatasaṃgītapustakam'. This colophon which has puzzled more than one scholar' may be said to record the tradition about the make-up of the extant redaction of the NŚ, which possibly incorporates and amplifies Nandikeśvara's original work as well as some earlier Nāṭyaśāstra. But as in the present state of our knowledge we do not know anything about either the original work of N., or the supposed earlier NŚ, the probability of AD. and the NŚ, borrowing from a common source comes to the foreground.

Such being the case we cannot give any precise idea about the upper limit to the date of the AD. But in spite of this the work does not seem to be quite recent. The treatment of the ten Avatāras of Visnu made in the AD, probably points to this direction. In its enumeration of the Avatāras this work omits the name of Buddha and gives Krsna's name in its stead. This omission may be explained as an anti-Buddhistic bias of the author. But considering the fact that the Hindus raised the Buddha to an Avatāra and respectfully mentioned him in works belonging to later ages, the theory of an anti-Buddhistic bias becomes weak. That the AD. put the name of Kṛṣṇa in the place of the Buddha in its enumeration of the ten Avatāras allows one to presume that the work might have been written in an age when the Buddha was still outside the Hindu pantheon. In the Matsya-purāna (47-247) and the Bhāgavata purāna (1.3.24)2, is mentioned for the first time the Buddha

I. Some have taken this colophon together with chapters (of the NS.) on $g\bar{\imath}ta$ and $v\bar{a}dya$ only and not with the entire work. Probably due to a wrong impression that $samg\bar{\imath}ta$ means only 'music' they did not venture to connect the colophon with the whole of the NS.—a work on $Samg\bar{\imath}ta$ which is made of the three things: $g\bar{\imath}ta$, $v\bar{a}dya$ and $n\bar{\imath}tya$.

^{2.} Hemchandra Raychaudhuri, Materials for the Study of the Early History of the Vaishnava Sect. Calcutta, 1920, page. 105.

lxxii

as one of the ten Avatāras of Viṣṇu. The lower limit to the date of the Matsya-purāṇa is the sixth century A.C., while the Bhāgavata-purāṇa is probably of a later date. Thus one may be tempted to fix the upper limit to the date of the AD. as the fifth century of the Christian era. But as we do not have any definite knowledge about the evolution of the Avatāra theory through different ages it would not be worth while to make any such statement.

Now, to sum up our investigation about the dates of the AD, we may say that the work surely existed at the beginning of the thirteenth century, and it may have existed even a few centuries earlier. But its existence (in the present form) before fifth century is doubtful, though the kernel of the work may go back to a more remote period still.

NANDIKESVARA'S ABHINAYA-DARPANAM TRANSLATION

आङ्गिकं भुवनं यस्य वाचिकं सर्ववाङ्मयम्। आहार्यं चन्द्रतारादि तं नुमः सारिवकं शिवम्॥

NANDIKEŚVARA'S

ABHINAYA-DARPANAM

Salutation

- 1. We bow to the $s\bar{a}ttvika$ Siva whose $\bar{a}igika$ is the world, whose $v\bar{a}cika$ is the entire language and whose $\bar{a}h\bar{a}rya$ is the moon and the stars etc.
- 1. This śloka of the AD, has been taken by the author of the SR, without any acknowledgment (vide, VII. 1). This work however recognizes Nandikeśvara as an authority on samgīta which includes mṛṭya and abhinaya (vide, I. 17,21). Besides the first śloka SR, takes from the AD, others as well. They have been pointed out in the Introduction § 16.

For meanings of sāttvika, ūngika vācika, and ūhārya see 39-41.

In this śloku Śiva has been compared with an actor whose means of expression are gesture and posture as well as voice and costume. One aspect of Hinduism sees in him the Supreme Divinity who reveals himself through the world, the human speech and the starry firmament. The image of Siva as a cosmic dancer and actor (Naṭa-rāja) is often to be met with in Hindu literature. (cf. MG. p. 13). Two very beautiful examples of the same from Sanskrit are quoted below.

पादस्याविभवन्तीमवनितमवनी: रचता: स्वरपातै: संकीचनैव दीश्यां मुहरभिनयत: सर्वलीकातिगानाम्। हिष्टं लक्त्ये षु नीयां ज्वलनकणमुचं वक्षतो दाहभीतिरित्याधारागरीधात् विपुर्गवज्ञियन: पात् वी टु:खन्त्यम्॥
_Mudrūrūlisasa, I. 2.

कल्पापायनिमान्तमान्यसमय सद्योमरङ्गाङ्गणं सम्प्राप्य प्रतताङ्ग्रहारवलनावैचित्राचितस्थिति:। आकाशे स्वयुष्ये व च विविधां स्टिष्टं समाम्दयन् वैलेक्यस्थपितस्वमेव भगवन् विश्वाकृतिर्म् भिष्ठ ॥

Guoted in the Abhinara-bhāratī on NS. (GOS.) IV. 260.

In the MG. magnala-śloka has been followed by a dialogue between Indra and Nandikeśvara (Indra-Nandikeśvara-samvāda) which does not occur in any ms. of the AD. used for this edition. The substance of this dialogue is as follows: Once Indra met Nandikeśvara and said that he intended to gain victory over Nataśekhara, a Daitya-dancer and needed the intended to gain victory over Nataśekhara, a Daitya-dancer and needed Then Indra was advised to listen to the Bharatārnara composed by Nandikešvara.

respectively, and made rules for this art $(\bar{sa}stra)$ which grants dutiful life (dharma), wealth (artha) and enjoyment $(k\bar{a}ma)$ as well as liberation (moksa), and which promotes fame, self-confidence, fortune and eleverness, and which gives rise to peace, patience and liberality and pleasure, and does away with misery, affliction, sorrow and despondency. This (art) is valued even more than the bliss which persons meditating on Brahman (the Supreme Soul) experience. Otherwise how could it captivate the heart of sages like Nārada?

Variety of Dances (Najana)

11-12. Dance which has this fourfold aspect (of *abhinaya*) is of three kinds: $n\bar{a}tya$, nrtta and nrtya, according to sages like Bharata and others.

Occasions for the Dance

12-14. Natya and nytta should be witnessed particularly at the time of a festival. Those who wish for good luck should cause nxtya to be performed on occasions like the coronation celebrations of kings, a festival, a procession with an image of a god, a marriage ceremony, the reception of a friend, the entry into a (new) town or house, and the birth of a son; for it (nxtya) is auspicious.

धर्मी धर्मप्रहत्तानां कामाः कामोपसेविनाम् ॥ I. 105. अबुधानां विवोधय वैदग्धां विदुषामपि । इत्थार्णां विलासय स्थेयं दृःखार्दितस्य च ॥ I. 107.

9-11 The MG, omits 11. The four items in 11. refer to pāṭḥya, abhinaya, gīta and rasa mentioned in 8.

12b-14 Compare with these the following passage from the NŚ.

विवाह-प्रसवावाह-प्रमीदासुर्द्यादिषु । विनोदकरणं वैव वृत्तमेतत् प्रकीर्तितम् ॥ IV. 262-263.

The songs of Alha along with dance and abhinaya are still found to be performed in U. P. at the birth of children (I owe this information to Prof. Kshiti Mohan Sen of the Viśvabharati). Only a generation ago Hindu women in some parts of Bengal celebrated births and marriages by song and dance which, however, could be witnessed only by members of their own sex, while girls performed dances in their own *cratas* which could be

Nātya

15. Nātya or nāṭaka which has some traditional story for its theme is an adoreable (art).

Netta

15. That (dance) which does not express mood ($bh\bar{a}ra$) by means of abhinaya is called nrtta.

Nytya

16. That (dance) which suggests flavour (rasa) and mood ($bh\bar{a}ra$) is called ntrya. This dance is always fit to find a place in the court of great kings.

Characteristics of a President

17. The President of the audience should be wealthy, intelligent, descriminating, an expert in making awards, versed in the science of music, versatile, celebrated, having pleasing virtues well-acquainted with gestures which express desires and moods, without

witnessed by all. This dance by ladies has now gone out of fashion though girls may still be found who dance during their *cratus*, but reently attempts are being made to revive these old dances and introduce new ones. In many parts of Western India, the dance is still greatly in vogue—the beautiful *Gurbā* dance of Gujarat women is a living art, and is well-known The dance as a domestic as well as religious institution still lingers over a great part of India.

- 15 Prijyam means 'adorable' i.e. 'worthy of admiration'. The distinction made by the AD, between netta and netya is not observed by the NS. This probably shows that the two works follow two divergent traditions. The MG, has here (p. 14) that netta 'is that form of dance which is void of flavour (rasa) and mood (bhāva)'.
- 16 In the MG, this is followed by a division of dance into *Lāsya* and *Tāṇḍava*, of which "Lāsya dancing is very sweet, and Tāṇḍava dancing is violent".
- 17 Evidently the original of the MG. reads this differently, and the reading there seems to be corrupt (p 15). The *subhāpati* means here the president of the assembly of spectators. His functions are to make pronouncement of the merit of a performance of a play and to distribute rewards to the *sūtradhāra* or leader of the troop of dancers and actors. For

envy or malice, well-disposed to people, possessed of rightful conduct, kind, patient, disciplined, well-versed in arts and proficient in abhinaya.

Characteristics of the Advisor (Mantrial

18. The Adviser of such a President, who speak in an intelligent and dignified manner are well-off and have a desire for fame, understand moods (bhāras), are able to destinguish between merit and demerit, know the arts of love, are upright and well-versed in polity, have a kind heart, are good scholars who are expert in distinguishing between different dialects, and possess a poetic faculty.—such Advisers shine (in the assembly).

The Character of the Audience (Subha)

19. The audience which is as it were the Wishing Tree (kalpa-rṛkṣa) shines with the Vedas as its branches, the $S\bar{a}stras$ as its flowers and the scholars as the bees adorning it.

another definition of *subhāpati* see SR. VII. 1345-1350. It should be noted in this connexion that this honour of presiding at the assembly of spectators was given to one on merit only.

18 The reading of the original of the MG, seems to be different here. (see p. 15). The description of the mantrins is not found in any of the principal works on samgita. This again may be said to show that the AD, follows a tradition which is different from that of the rest (vide notes on 15.) The functions of the mantrins seem to be assisting the President. The need of an expert for the appreciation of different dialects (i.e. Prākrits) probably points to a time when the difference among them were not easily to be marked.

19 The MG, adds to the character of the audience the following: "where men of truth are found, shining with good qualities, famous for righteous conduct, honoured by kings, adorned by the Vedas; where Vedānta is expounded; when distinguished by the sound of voice and lute $(r\bar{n}p\bar{a})$; possessing heroes of reknown, ornamented by resplendent princes, shining with royal splendour" (p. 15). This gives also the seven limbs of the audience as men of learning, poets, elders, singers, buffons and those who are familiar with history and mythology (p. 15).

The Arrangement of the Audience

20-23. A President of the audience as described before should sit joyfully (in the hall) with his face towards the east. On his two sides should sit poets, advisers and friends. Dance should be performed in front of him. And the place (of dance) is called rainga (the stage). When the dancing girl will be in the rainga a very good dancer (naļa) should remain near her. On her right side should stay two men with cymbals and two (persons with) mrdaingas should be on her two sides. A singer should remain between the latter two, and the drone (śrutikāra) should be near at hand. In this order should a group of players sit at the begining of a nātya.

Characteristics of a Dancing Girl (Pātra)

23-25. She should be slender-bodied, beautiful, young, with full round breasts, self-confident, witty, pleasing, knowing well when to begin (a dance) and when to stop, having large eyes, able to perform in accompaniment of vocal and instrumental music, and to observe the proper time-beats, having splendid dresses and possessing

मलीनसिग्धविसीर्णकेशपाशनिविशितः। ग्रस्थिवलुलितः पृष्ठे लसत्पुण्यावतंसकः॥ वृंगी वा मग्ला दीर्था मुक्ताजालविराजितैः। कलितं कुग्छलेभीलं कस्तूरीचन्द्रनादिना ॥ रिवतं विचकं भाले नेत्रे लन्वञ्चनाश्चितः। उन्नसत्कान्तिवलग्रे तालपते च कर्णग्रेः॥ दन्तपंक्तिप्रभाजालप्रोञ्चलीक्षतरङ्गभूः। कस्तूरीपचभङ्गाङ्गौ कपोली कग्छलम्बिता ॥ ताराहारावलि स्थलमौक्तिका सनमण्डना। प्रकोष्टी न्यसमुद्रवसीवर्णवल्यानिती॥

²² The śrutikāra, according to Prof. Kshiti Mohan Sen, is represented in modern times by the instrument called $T\bar{a}n-p\bar{u}r\bar{u}$.

²³b-25 The word pātra for a dancing girl is to be noted: it is found in Medieval India (in Hindi) as pātura and pāturiyā, in the same sense. A dancing girl must be beautiful; for according to SR, the true dance relates to a beautiful body and dances other than this are caricatures (चार्वधिष्ठानववृद्धं उत्तमन्यर्विडम्बना VII, 1249). The MG, seems to have considerably missed the sense of this passage. Kuśalā-graha-mokṣayoḥ has not been properly explained even in the footnote (p. 16). Next to her personal beauty, a good make-up is necessary for a dancing girl. We quote below in this connexion what SR, understands by such a good make-up etc.:—

a happy countenance. A girl having all these qualifications is called a dancer ($p\overline{a}tra$).

Her Disqualifications

26-27. The ten kinds of women that should be avoided in the $n\bar{a}tya$ are: women with white specks on their eyeballs, or women who have scanty hair, or have thick lips or pendant breasts, or who are either very fat or very thin, or are either very tall or very short, or hunch-backed, or have no voice.

Essentials of a Duncing Girl

27-28. Agility, steadiness, $rekh\bar{a}$, practice in *bhramarī* movement, the glancing eye, endurance, memory, devotion (to her art), (clear) speech, good singing powers, these ten are the essential qualities of a dancing girl. Dance should be performed by a dancing girl possessing these qualifications.

श्रङ्गुन्थो धृतमाणिकानीलवन्नादिसुद्रिका: । चन्द्रनेर्ध्मुरं गातं यहा कुङ्गमरिक्षतम् ॥ चीरीदकं दुक्लादि वस्तं कुर्पामकासनु: । सकत्रुकं वा चलनं तत्त्रद्देशानुमारत:॥ एतन्मग्डनमन्यद वा पाचयो: ग्यामगीरयौ: । यथोचितं विधातन्यमित्याह: श्ववक्रभ: ॥ VII. 1250-1257.

The NS gives the following qualifications of the pātra.

बुद्धि: सत्त्वं सक्यं च (मृद्ध्यत्वं) लयताल्ख नान्यथा (-ता तथा)।

रमभावज्ञता चैव वयःस्थ्यतं (वयःसच्य) कुतूहलम् ॥ यहणं धारणं चैव गानं नाव्यक्षतं तथा।
जितश्वमोक्साहाविति पाचगतो विधि:। XXVII. 97-98.

The following description of the pūtra occurs in the SR.

मी छवं रूपसम्प्रतिश्वास्त्रिक्षाणैवक्कता । विशासने चता विस्वाधारता कान्तदन्तता ॥

मृक्षण्डकस्तुता विक्रमतासम्बाहृता । तनुमध्योद्वति स्थृलनितस्वकरभीकृता ॥

श्रत्युच्चखवंपीनत्वराहित्यमिश्ररात्वता । लावण्यकान्तिमाध्यधेर्यदेदार्थप्रगरस्थता ।

शीरता श्यामता चिति तज्जों : पाचगुणा मता: ॥ VII. 1241-1244.

26b-27a The MG. evidently reads $vesy\bar{u}$ $n\bar{u}tye$ $vivarjit\bar{u}h$ (p. 16). This is obviously a misreading. $Pusp\bar{u}ks\bar{\iota}$ translated as 'whose eyes are pale like flower' means 'a woman whose eyes have white or whitish specks in her eye-ball (p. 16). The SR. does not give any specific $p\bar{u}tra$ -dosa, but says that absence of gunas is to counted as dosa in a $p\bar{u}tra$. (see VII, 1247).

27b-28 $Rekh\bar{a}$ in this passage has a technical meaning. The following is the definition of the same from the SR.—

शिरोनेचकरादीनामङ्गानां मेलने सति। कायस्थितिर्मनोनेचहारी रेखा प्रकीर्तिता: ॥ VII. 1226,

Qualities of the Bells (for the feet of the Dancing Girl)

29-30. Tiny bells (kinkinī) made of bronze (kāmsya) should have pleasant sound, and should be well-shaped, and have the stars as their (tuetlary) deities, and should remain one angulī apart from one another. The dancing girl should bind a hundred of them or two hundred in each of her two feet with blue thread in tight knots.

Introductory Benediction, etc.

31. Praising Gaṇapati the god of muraja (=drum) and the Sky one should pray to the Earth. Then by means of various

In the light of the above definition the translation of *rekhā* in the MG. (p, 17) simply as 'symmetry' does not seem to be accurate. This word may be translated better as 'harmony of lines in adjusting limbs in dance' or as 'graceful lines of the figure'. For *bhramarī* see 289 ff.

The above enumeration of the merit of the $p\bar{a}tra$ by the AD, has been described by the MG, as $p\bar{a}trasyah$ antah $pr\bar{a}n\bar{a}h$ (outer lives) which has been supplemented by a quotation from some unknown source which describes $p\bar{a}trasyah$ bahih $pr\bar{a}n\bar{a}h$ (outer lives). The outer lives of the $p\bar{a}tra$ are as follows: "the drums, cymbals of a good tone, the flute, the chorus, the drone, the lute $(r\bar{a}n\bar{a})$, the bells, and a male singer $(g\bar{a}yana)$ of reknown".

The definition of a dancer or actor (nata) given in the MG, is as follows: "Wise men say that the dancer (or actor) should be handsome, of sweet speech, learned, capable, cloquent, of good birth, learned in scriptures (śūstrus) of art and science, of good voice, versed in song, instrumental music, and dancing self-confident and of ready wit. Such an enumeration is shows the degenerating tendency in the later theorist, for the passage is surely from a late work treating abhinaya. This does not occur in the AD.

31 The MG, omits this section as well as the three following ślokas on stuti and puṣpāūjati, but curiously enough describes in a passsge quoted from elsewhere the Vulgar dance (vīca nāṭya) as a dance begun without prayer etc. and opines that those who witness the Vulgar dance will have no children and will be reborn in animal wombs (p. 17).

The purasmai-pada of the root rabh in this śloka and in śloka 34. is a violation of grammatical rule. This may not be explained as a sign of the antiquity of the work, for the writers of technical treatises naturally

musical performances offer worship (to these gods). Again after many kinds of charming tunes have been performed, the dancing girl should have the permission of her preceptor for beginning to dress herself suitably.

Praise of the Goddess of Ranga

32. O Goddess of ranga, victory to thee. Thou art the patron of the actor-class, the embodiment of the joy accruing from moods $(bh\bar{a}vas)$ and rasas, yours is the $kal\bar{a}$ (art) that only can charm the whole world, victory to thee.

Offering of Flowers

33. Then to destroy evils, to protect living creatures, to please gods, to bring edification to spectators, welfare to the leader (of the naṭa-group), to protect the dancing girl (herself) and to make the teaching of her preceptor fruitful, the dancing girl should begin to offer flowers (to gods).

cared more for the subject than the grammar and the style. And this violation of grammar may also be due to the influence of Prakrit which the author of the work in all likelihood spoke. The MG. omits this passage (*Prārthanādikam*).

32 The MG omits this. It is curious that *a goddess* is invoked as the presiding deity of the stage.

The NŚ. simply mentions that gods should be bowed (IV. 273) and enumerated them earlier (III. 23 ff). This also may be interpreted as shewing that the AD. follows a tradition of its own.

- 33-34 The MG. omits this. Offering of flowers (puṣpānjali) has been mantioned in the NŚ. too (IV. 272). All these formalities compulsory at the beginning of a dance or drama shows probably its original religious character. For the parasmai-pada of the root rabh see notes on 31 above.
- 34 Dhanika in his vrtti on Dhanañjaya's Daśarūpaka (Ed. Hall. p. 111.) defines $P\bar{u}rvarunga$ as follows:

पूर्वं रच्यतेऽिसान्निति पूर्वरङ्गो नाट्यशाला। तत्स्यप्रथमप्रयोग-व्युखापनादौ पूर्वरङ्गताः

Besides this there are other definitions of the same e.g.

"सभापति: सभा सभ्या गायका वादका ऋपि।

नटी नटश्र मोदन्ते यचान्योन्यानुरञ्जनात्॥

Principles of Natya

35-36. After finishing the $p\bar{u}rva$ -ranga in this way she should then perform nrtya. Her nrtya, and songs accompanied by abhinaya should show moods and conform to proper beats of time. She should sing with her mouth, express the meaning (of the song) by (gestures of) her hands, show moods by her eyes, and beat time with her feet. Where the hand goes eyes also should go there. Where the eyes go mind also should go there. Where the mind goes there the mood $(bh\bar{a}va)$ should follow and where the mood goes, there flavour (rasa) arises.

Four kinds of Abhinaya

38. It is said that abhinaya is preponderant there *i.e.* in the nrtya described before. There are four kinds of abhinaya: $\bar{a}igika$ (of limbs), $v\bar{a}cika$ (of speech), $\bar{a}h\bar{a}rya$ (of dress etc.) and $s\bar{a}ttvika$.

\overline{A} ngika

39. \overline{A} ingika abhinaya is shown by means of limbs.

Vācika

39. $V\bar{a}cika\ abhinaya\ has\ a\ place\ with\ regard\ to\ k\bar{a}vyas$ (poems) and $n\bar{a}takas$ (dramas) which are made up of speech.

श्रती रङ्ग इति चिथः पूर्वे यत् स प्रकल्पाते।
तस्माद्यं पूवरङ्ग इति विद्विह्नस्थिते॥"
"यज्ञान्यवस्तुनः पूर्वे रङ्गविद्वीपशान्तये।
कुश्रीलवाः प्रकुर्वेन्ति पूर्वरङः स उत्थति॥"

But according to Rāghavabhaṭṭa only 12 among its 22 limbs are to be called $P\bar{u}rraranga$ proper. These 12 limbs are $Utth\bar{a}pana$, four kinds of Parivartana, and the 7 parts of the $N\bar{a}nd\bar{\imath}$ such as $Apakṛṣṭ\bar{a}$ $dhruv\bar{a}$, Śuṣkāvakṛṣṭā $dhruv\bar{a}$, $Rangadv\bar{a}ra$, $C\bar{a}r\bar{\imath}$, $Mah\bar{a}c\bar{a}r\bar{\imath}$, Trigata and $Pr\bar{a}rocan\bar{a}$ (Vide. NŚ. V. 22ff).

- 35 $Bh\bar{a}ra$ (the expression of mood by means of gesture) as well as $t\bar{a}la$ (beat of time) was essential for the proper performance of dance, drama and songs in a drama.
- 36-37 These two ślokas sum up one cardinal principle of the Indian dance and abhinaya.
 - 39 In the MG. (p. 17) we have an etymology of the word

Ahārya

40. $\overline{A}h\overline{a}rya\ abhinaya$ is the decoration of the body by means of necklace and armlet etc.

Sāttrika

40-41. Sāttvika abhinaya is performed with Sāttvika emotions by those who know how to represent them. Motionlessness, perspiration, horripilation, change of voice, trembling, change of colour, tears and fainting are the eight sāttvika conditions.

Agents in Angika Abhinaya

42. \overrightarrow{A} is named as such because it is expressed in three ways by a inga, pratya inga and u p \overline{a} inga.

Anga

42-43. The six, such as, head, hands, chest, sides (flanks), waist (hips) and feet are called *angas*. Others include neck also among these.

Pratyanga

43-45. The six, such as, shoulder-blades, arms, back, belly, thigh (calves) and shanks are called *pratyangas*. Others add three more, such as, wrists, elbows and knees to this, and the neck also.

छन्द: पादी तु वेदस्य इस्ती कल्पोऽथ पञ्यते। ज्योतिषामयनं चचु र्निक्तं योचमुचते। थिचा प्राणं तु वेदस्य सुखं व्याकरणं स्वतम्॥

The NS. agrees with the AD. in its enumeration of the sadanga (cf. NS. VIII, 13).

43-45 Apare means 'other authorities' which may be 'persons as well as books; most probably both are meant here. The NS. does not

abhinaya (cf. NŚ. VIII. 5ff) and after this it is stated that the AD is concerned with the $\bar{a}ngika$ abhinaya only.

⁴⁰⁻⁴¹ MG. omits this portion and the first half of 42.

⁴²⁻⁴³ MG. has 'armpits' (kakṣa) for 'chest' (rakṣa). Perhaps on an analogy of the enumeration of six limbs in connexion with drama and dance the six accessories the Vedic studies have been called saḍaṅga. For obvious reasons limbs named in the two groups are not identical. Verses describing the Vedic saḍaṅga are as follows:

Upānga

45-49. Scholars called shoulder an $up\bar{a}nga$, and eyes, eyebrows, eyeballs, cheeks, nose, jaw, lips, teeth, tongue, chin and face are also called $up\bar{a}ngas$. Thus $up\bar{a}ngas$ in the head are twelve in number. In other limbs there are besides these others, such as, heels, ankles, toes and fingers. I speak of these things according to $s\bar{a}stras$ (=rules of the art) which were extant before me. They i.e. angas, pratyangas and $up\bar{a}ngas$ are to be used in every dance. Their description will be given in due order. But when an anga (major limb) moves, the pratyanga and $up\bar{a}nga$ also move; hence all of them are not described here in this work.

The Classification of Head-gestures

49-50. Sama, $Udv\bar{a}hita$, Adhomukha, $\overline{A}lolita$, Dhuta, Kampita, $Par\bar{a}vrtta$, Utksipta $Pariv\bar{a}hita$ are the nine head-gestures named by those well-versed in the rules of $N\bar{a}tya$.

enumerate the pratyangas though it mentions the word once in this connexion (Vide VIII, 12).

45 Upāngas mentioned in the NS. are only six.

नेत्रभ नासाधरकपोलचिस्तान्युपाङ्गानि, VIII. 13.

48-49 This plea for not defining all the different pratyangus and upāngus is good and is in sharp contrast with the elaborate treatment of upāngus in the NŚ. (Vide. VIII. 37-171).

49-50 After treating these head gestures the MG. quotes a different treatment of them according to which they are twentyfour in number (p. 19). They are as follows:

धुत, विधुत, आधुत, अवधुत, किम्पित, अकिम्पित, उदाहित, परिवाहित, अखित, निह्ञित, परावृत्त, उत्चित, अधीमुख, लीलित, तियौँद्रताद्रत, खन्धानत, आगविक, सम, पार्श्वाभिमुख, सीम्य, आलीलित, तिर्योन, प्रक्मित, सीन्दर्थ.

Though the MG. fathers the above upon Bharatācārya, the NS. treats the head-gestures differently (cf. VIII. 15-35).

Sama (level)

51. The head when it is motionless but is not bent or raised up is named Sama.

Uses

51-52. Sama head is used at the beginning of a nṛṭya, in sitting for prayers etc., in pride and feigned anger of love, stupefaction and cessation from action.

Udvāhita (raised-up)

52. When the face is raised up, the head is named *Udrāhita* (raised up).

Uses

53. In denoting a flag, the moon, the sky, the mountain, (bodies) moving in the sky or skywards, and very high objects the wise people use the $Udv\bar{a}hita$ head.

Adhomukha (down-cast face)

54. When the face is cast down the head is called Adhomukha.

Uses

54-55. In denoting bashfulness, grief, bowing, anxiety, fainting, things placed below, and a plunge in water, this head is used.

Alolita (rolling)

- 55-56. When the head is moved round it is called $\overline{A}lolita$.

 Uses
- 56. In denoting sleepiness, possession by evil spirit, intoxication, fainting, travelling, a wild and uncontrolled laughter this head is used.

Dhuta, (shaken sideways)

57. When the head is moved from the left side to the right one and vice versa the head is called Dhuta.

⁵¹b-52a The MG. gives the uses of the Sama head as 'prayer, authoritative speech, satisfaction, anger, indifference, or inaction' (p. 18).

⁵²b The MG. has 'raising the head and keeping it still'. (p. 18).

⁵⁴⁻⁵⁵a The MG. has 'regarding anything vile' after 'bowing' (p. 18).

⁵⁶ The MG. has 'dizziness, hesitation, laughter, etc.' after 'fainting'.

Uses

57-59. In denoting 'It-does-not-exist,' looking repeatedly to sides, discouraging others, astonishment, sadness, unwillingness, effect of cold and fever, fear, the first stage of drinking liquor, battle, effort, forbidding, revenge, glancing at one's own limbs and calling one from sides, this head is used by Bharata and others.

Kampita (nodded)

60. When the head is shaken up and down it is called Kampita head.

Uses

60-61. To denote the offence taken, saying 'Do stop', enquiry, hinting, calling from near, inviting the deities, and threatening, this head is used.

Parārṛtta (turned-round)

61. When the face is turned round the head is called $Par\bar{a}vrtta$.

Uses

62. In denoting the command 'That should be done', anger, shame, turning away the face, slighting, hair (of the head), and a quiver, this head is used.

Utksipta (thrown-up)

63. When the head is turned aside and then raised up it is called *Utkṣipta*.

Uses

63-64. To denote the command or request 'Take this' or 'Come', the supporting of (something) and acceptance, this head is used.

Parirāhita, (widely moved)

64. When the head is moved from side to side like a *chauri* the head is called *Parivāhita*.

- 57b-59 The MG. gives the uses as looking 'repeatedly at thing, condolence with others, astonishment, dismay, indifference'......preparing for battle, rejection, impatience,...summoning from both sides'. SR. assigns some of the uses to the *Vidhuta* and some to the *Adhuta* head. (cf. VII. 56, 57).
- 62 The MG. gives the uses as follows: 'Saying "Do this', aversion, modesty, quiver, relaxing the features, slighting, hair, etc'. Rāghavabhatṭa quotes the AD. on the *Parāvṛṭta* head. (Nirṇayasāgara Ed. p. 40).

Uses

65. In denoting infatuation, yearning for the separated lover, uttering the praise of a deity, satisfaction, approval and cogitation, this head is used.

Different Glances

66-67. According to ancient masters glances are eight in number such as Sama, $\overline{A}lokita$, $S\overline{a}c\overline{\imath}$, Pralokita, $Nim\overline{\imath}lita$, Ullokita, Anuvrtta and Avalokita.

Sama (level)

67. The (straight) glance (without moving the eye-lashes), like that of a female divinity, is called Sama.

Uses

68. It is used to denote the beginning of a nātya, scale, an effort to think out what another person is thinking, surprise, and the image of a god.

Alokita (keen glance)

69. Gazing quickly with open eyes is called $\overline{A}lokita$.

Uses

69-70. It is used to denote the turning of a potter's wheel, showing all sorts of objects, and begging.

$S\bar{a}c\bar{\imath}$ (sidelong)

70. Looking out of the corner of the eyes is called $S\bar{a}c\bar{\iota}$ according to those versed in the rules of the $N\bar{a}tya$.

66-67 The NŚ. also describes eight glances, but differently (VIII. 101-105). Evidently a different tradition has been followed there. In addition to the eight glances the MG. gives from another source the following fortyfour kinds of glances (pp. 21-22).

सम, प्रलोकित, सिन्ध, प्रहार, उज्ञोकित, अर्भुत, कर्मण, विस्मय, छप्त, विषस, भयानक, साची, हत (हत ?), धीर, रीष्ट्र, दूर, दक्षित, विलोकित, वितर्कित, प्रक्षित, अभित्तप्त, अभित्ति, प्रस्प, हष्ट, उग, विभान, प्रान्त, मीलित, स्चन, लिज्ञित, मिलिन, वस, स्नान, मुकुल, कुश्चित, आकाण, अर्थमुकुल, अनुवत्त, विद्युत, जिज्ञा, विकीण, मिदर, हृदय, लिलित.

68 The expression 'Thinking of some other person' seems to be the translation of a wrong reading for anyacintā-viniścaye in the original of the MG.

69a The MG. has this as 'swiftly turning with keen glances' (p. 21).

Uses

71-72. It is used to denote hinting, touching moustache, making mark with an arrow, a parrot, remembering, and beginning of deeds.

Pralokita (wide-glance)

72. Looking from side to side is called Pralokita.

Uses

73. It is used to denote things situated on both sides, pointing out, excessive affection, moving, and idiocy.

Nimīlita (closed)

74-75. Half-closed eyes make Nimīlita glance.

$_{ m Uses}$

74-75. It is used to denote a snake, being under another man's power, muttering (prayers etc), meditation, salutation, lunacy, and keen observation.

Ullokita (looking up)

75. Looking upwards is called *Ullokita*.

Lises

76. It is used to denote the top of a flag, a tower, the heavenly orbs, previous birth, height and moon-light.

Anuvrttu

77. Glancing quickly up and down is called Anucrtta.

Uses

77. It is used to denote angry looks, and greeting of friends.

Avalokita (looking down)

78. Looking downwards is called Avalokita

Uses

78-79. It is used to denote looking at a shadow, reflection, exercise, fatigue, study, looking at one's own limbs.

Besides these the MG. gives six movements of brows as mentioned elsewhere. They are as follows:

⁷² The MG. has here 'aiming arrow, hinting and Kulaṭa nāṭya'.

⁷³ The MG. has 'making signs, moving and discordant mind.'

⁷⁴⁻⁷⁵ The MG. has 'the appearance of a sage (rsi).'

सङ्ज, पतित, उत्चिप्त, चतुर, रेचित, कुञ्चित.

Different Neck Movements

79-80. According to those who know of mood $(bh\bar{a}ra)$ there are four necks: $Sundar\bar{\imath}$, $Tirasc\bar{\imath}n\bar{a}$, $Parivartit\bar{a}$, $Prakampit\bar{a}$.

Sundarī.

80. When the neck is moved to and fro horizontally it is called Sundari.

Uses

81. It is used to denote the beginning of affection, effort, in the sense of 'completely', width, and approval with pleasure.

Tiraścīnā

82. The neck making an upward movement on both sides like the gliding of a snake is called *Tirascīnā*.

$_{ m Uses}$

83. It is used to denote exercise with a sword, and the gliding of a snake.

$Parivartitar{a}$

83-84. The neck moving from right to left like a half-moon is called $Parivartit\bar{a}$.

Uses

84-85. By those who know the $n\bar{a}tya$ -tuntra, it is used to denote an erotic dance ($l\bar{a}sya$), and kissing the two cheeks of the beloved.

Prakampitā.

85-86. The neck when it is moved backward and forward like the movement of a she-pigeon's neck is called $Prakampit\bar{a}$.

Uses

86-87. It is used to denote to say 'you and I', folk-dances, swinging and the inarticulate murmurings, and the sound uttered by a woman at the time of conjugal embrace.

⁸¹ The MG. has "well-done"! recollection, badinage, sympathetic pleasure'.

⁸⁷a The MG. has 'counting' (= ganite?) for manite.

⁸⁷b-88a The MG. puts in before this twelve lives of hands (hasta- $pr\bar{a}n\bar{a}h$). They are as follows:

प्रसारण, कुञ्चित, रेचित, प्रक्षित, श्रपवेष्टित, प्रेरित, उद्देष्टित, व्यावृत्त, परिवृत्त, सङ्केत, चिह्न, प्रदार्थटीका-

The Classification of Hands

87-88. Now the characteristics of hands will be described by me. They are of two kinds: single and combined.

Twenty-eight Single hands.

88-92. In the beginning the characteristics of single hands will be told. They are twenty-eight in number. Patāka, Tripatāka, Ardhapatāka, Kartarīmukha, Mayūra, Ardhacandra, Arāla, Śukatunḍa, Muṣṭi, Śikhara, Kapittha, Kaṭakāmukha, Sūcī, Caudra-kalā, Padmakośa, Sarpaśiras, Mrgaśīrṣa, Siṃhamukha, Kāṅgula, Alapadma, Catura, Bhramara, Haṃsāsya, Haṃsapakṣa, Saudaṃśa, Mukula, Tāmracūḍa and Trisūla.

Patāka (flag)

93. The hand in which the thumb is bent to touch the fingers, and the fingers are extended is called $Pat\bar{a}ka$

Uses

94-100. It is used in the beginning of a $n\bar{a}tya$ and to denote the clouds, a forest, forbidding things, the bosom, might, a river, region of gods, the horse, cutting, the wind, lying down, attempt at going, prowess, favour, moonlight, strong sunlight, forcing open doors, meaning of seven case-endings, wave, entering a street, equality, anointing the body of one's ownself, taking an oath, silence, palmyra leaf, shield, touching things, benediction, the ideal king, saying 'such and such a place', the sea, the succession of good deeds, addressing a person, going forward, holding a sword, a month, a year, a rainy day, and cleaning with broom.

Tripatāka, (a flag with three)

100. When the ring-finger is bent in a $Pat\overline{a}ka$ hand it is called $Tripat\overline{a}ka$.

Uses

101-102. It is used to denote a crown, a tree, the vajra (thunderbolt of Indra) and the bearer of vajra (Indra), the Ketakī

चिषताककारेणान्यानपगर्यान्तरा कथाम्।

¹⁰⁰ It is noteworthy that $jan\bar{a}ntike$ (= aside) does not occur in the riniyoga of the $Tripat\bar{a}ka$ hand though the Daśarūpaka has the following :

flower, a lamp, raising flames, a pigeon, patterns drawn on the face or breast ($patralekh\overline{a}$), an arrow, and turning round.

Ardhapatāka (half-flag)

103. If the little finger of the $Tripat\bar{a}ka$ hand is bent down it is called $Ardhapat\bar{a}ka$.

Uses

103-104. It is used to denote leaves, a board or slab for writing or painting, the bank of a river, saying 'Both', a saw, a knife, a banner, tower, and a horn.

Kartarīmukha

105. If the fore-finger and the little finger of the same hand $(Ardhapat\bar{a}ka)$ are outspread it is called $Kartar\bar{\imath}mnkha$.

Uses

106-107. It is used to denote the separation of man and woman, overturning or opposition, plundering, the corner of the eye, death, estrangement, lightning, sleeping alone during separation, falling and weeping.

Mayūra (peacock)

108. When the ring-finger of the Kartarīmukha hand is joined to the thumb, and other fingers are extended it is called the Mayūra hand.

Uses

109-110. It is used to denote the peacock's neck, a creeper, a bird, vomiting, removing hair, an ornamental mark on the forehead (tilaka), scattering (agitating) the river-water, discussing the $\angle \bar{a}stras$, and a famous thing.

¹⁰²a The MG. has 'cheek' (= kapola) for 'pigeon' (= kapota).

The MG. gives additional definitions of the following hands from another work: पतान, विपतान, नर्तरीसुख, अर्धनन्द्र, अरान, ग्रनतुग्छ, सृष्टि, शिखर, कपिख, कटनासुख, स्ची, पद्मनोग, संपीश्वर:, स्वगिश्वर:, सिंहसुख, लाङ्गुल (= काङ्गुल ?), सोलपद्म (= भ्रनपद्म ?), चतुर, भ्रमर, इंसास्त, इंसपच, सन्दं ग, सुन्तन, तामचूड. The author of this work invents the sage (rsi), race (vaṃśa), colour (ruma) and the guardian deity (devatā) etc. of the hands (pp. 27 ff). We cannot ascertain what led him to give a Vedic colouring to these evidently extra-vedic things.

Ardhacandra (half-moon)

111. If the thumb of the $Pat\bar{a}ka$ hand is stretched out the latter is called Ardhacandra.

Uses

111-113. It is used to denote the phase of the moon on the eighth day of the dark fortnight, a hand seizing the throat, a spear, consecrating an image, a dining plate, origin, the waist, musing, one's ownself, meditation, prayers, touching limbs, and greeting by common people.

Arāla (bent)

114. When the fore-finger of the $Pat\bar{a}ka$ hand is curved the latter is called $Ar\bar{a}la$.

Uses

114. It is used to denote drinking poison, nectar etc., and violent wind.

Śukatunda (parrot's head)

115. Arāla, when its third finger is bent, is called Śukatunda.

Uses

115-116. It is used to denote the shooting of an arrow, a spear, remembering one's abode, saying of mystic things, and violent mood.

Musti (fist)

116-117. When the four fingers are bent into the palm and the thumb is set on them that hand is called *Muṣṭi*.

Uses

117-118. It is used to denote steadfastness, grasping the hair, holding things, and the fighting mood of the wrestlers.

Śikhara (peak)

118. If Musti hand has its thumb raised up it becomes Śikhara.

Uses

119-121. It is used to denote amour (or god of love), a bow, a pillar, certainty, making offering to manes, the upper lip, something entered, a tooth, questioning, the phallic symbol, saying 'no', recollection, near about abhinaya (?), pulling at the girdle, the act of embrace, and sounding a bell.

Kupittha (elephant-apple)

121-122. If in the $\acute{sikhara}$ hand the fore-finger is bent over the top of the thumb, it is called Kapittha.

Uses

122-124. It is used to denote Lakṣmi, Sarasvati, holding cymbals, milking cows, collyrium, holding flowers at the time of dalliance, grasping the end of robes, gathering of cloth and offering incense or light.

Kaṭakāmukha (opening in a bracelet)

124-125. The *Kapittha* hand with the fore-finger and the middle finger applied to the thumb is called the *Katakāmukha*.

Uses

125-127. It is used to denote picking flowers, holding a pearl necklace or garland of flowers, drawing the middle of the bow, offering betel leaves, preparing the paste of mask and sandal etc., by rubbing them against something, applying perfumes to something, speaking, and glancing.

Sīicī

127-128. The $Katak\bar{a}mukha$ hand with its fore-finger raised is called $S\bar{u}c\bar{i}$.

Uses

128-131. It is used to denote the number one, the Supreme Soul (Para-brahma), one hundred, the sun, a city, the world, saying 'like that' and 'that which', in the sense of crowdless, threatening growing thin, a rod, the body, astonishment, a braid of hair, an umbrella, capability, hairs, beating drum, the potter's wheel, circumference of a wheel, consideration, and the decline of the day.

Candrakalā (digit of the moon)

132. The $S\bar{u}c\bar{i}$ hand after releasing the thumb is called the $Candrakal\bar{a}$.

Uses

132-133. It is used to denote the moon, the face, the span of the thumb and forefinger, and objects of that shape, the crown of Siva, the Ganges and a cudgel.

Padmakośa (lotus-bud)

134. When the fingers are separated and a little bent and the palm is also a little hollowed, the hand is called Padmakośa.

Uses

135-137. It is used to denote fruits, such as the bel and the elephant-apple, the round breasts of a woman, a circular movement, ball, cooking pot, taking meals, a flower-bud, mango, scattering flowers, cluster of flowers, $jap\bar{a}$ flowers, bell, an ant-hill, a lotus and an egg.

Sarpašīrsa (snake-hood)

137. When the tips of fingers in the $Pat\bar{a}ka$ hand are bent it is called $Sarpa\bar{s}\bar{\nu}sa$.

Uses

138-139. It is used to denote sandal paste, a snake, the middle-tone, sprinkling, nourishing, giving water to gods and sages, the moving to and fro of the two *Kumbhas* (the slight protuberances of the head) of an elephant, and the arms of wrestlers.

Migaśīrsa (deer-head)

139. When the thumb and the little finger of the Sarpaśīrṣa hand are extended it becomes Mrgasīrṣa.

Uses

140-142. It is used to denote women, cheek, the wheel, a limit, fear, quarrel, costume or dress, calling, tripundraka mark on the forehead, a deer's head, a lute, massage of the feet, getting of one's all, the female-organ, holding an umbrella, stepping, and calling the beloved.

Simhamukha (lion-face)

142-143. When tips of the middle and the third finger are applied to the thumb and the rest of the fingers are extended the hand is called Simhamukha.

Uses

143-144. It is used to denote homa, a hare, an elephant, waving $hm\acute{s}a$ -grass, a lotus garland, a lion's face, preparations of medicine by physicians, and rectification.

Kāngula

144. The Padmakośa, when its third finger is curved, becomes $K\bar{a}igula$.

Uses

145-146. It is used to denote lakuca fruit, bells worn by children, any other bell, a partridge, the betel-nut tree, the breast of a young girl, a white water-lily, the $v\bar{a}taka$ bird and the $n\bar{a}likera$ creeper.

Alapadma

146. When fingers beginning from the little finger are bent and separated from one another the hand is called *Alapadma*.

Uses

147-149. It is used to denote a full-blown lotus, elephant-apple, a circular movement, the breast, separation from the beloved, looking-glass, the full moon, beauty, the hair-knot, the moon-tower, a village, height, anger, a lake, a cart, $cakrav\bar{a}ka$, murmuring sound, and praise.

Catura

149-150. When the thumb is placed at the foot of the third finger and the fore-finger and adjoining two fingers are clinging to one another and the little finger is outstretched, the hand is called Catura.

Uses

150-152. It is used to denote musk, a little, gold, copper, iron, wet, sorrow, aesthetic pleasure, the eye, difference of castes, proof, sweetness, slow gait, breaking to pieces, face, oil or ghee.

Bhramara (bee)

152-153. When the thumb and the middle finger touch each other and the fore-finger is curved and the remaining fingers are outstretched the hand is called the *Bhramara*.

Uses

153-154. It is used to denote a bee, a parrot, a wing, a crane, a cuckoo, and similar birds.

Humsüsya (śwan-beak)

154-155. If the thumb and the fore-finger touch each other and the remaining fingers are stretched out, the hand is called the Humsāsya.

Uses

155-157. Blessing or festival, the tying with thread, ascertaining the instruction, horripilation, pearls, putting forward the wick of a lamp, a touchstone, the jasmine, a painting, the act of painting, and a dyke impeding a current.

Hamsapaksa (swan-wing)

157-158. If the little finger of the Sarpaśīrṣa hand is outstreched the hand is called the Hamsapakṣa.

Uses

158-159. It is used to denote the number six, the construction of a bridge, putting the nailmarks and a covering or sheath.

Sunda**ms** (pincers)

159-160. If the fingers of the *Pudmakośa* are brought close to one another and drawn apart from one another in quick succession, the hand is called the *Sandamśa*.

Uses

160-161. It is used to denote the belly, presentation of an offering to deities, a wound, a worm, great fear, worship, and the number five.

Mukula (blossom)

161-162. If the five fingers of a hand meet together, the hand is called the Mukula.

Uses

162-163. It is used to denote the water-lily, eating, the God of Love (with his five arrows), holding of a signet or seal, the navel and a plantain flower.

Tāmracīīda (cock)

163. If the fore-finger of the Mukula is curved the $T\bar{a}mvav\bar{u}da$ hand will result.

Uses

164. It is used to denote a cock, a crane, a crow, a camel, a calf and a pen.

Trisīila (trident)

165. If the thumb and the little finger are curved the hand is called the Trisula.

Uses

165. It is used to denote a bel-leaf, and the idea of trinity.

Vyāghra (tiger)

166. If the little finger and the thumb are bent in the Mrgasirsa hand the $Vy\bar{a}ghra$ hand will be the result.

Uses

167. It is used to denote a tiger, a frog, a monkey and the mother of pearl.

Ardhasīicī

167. If the thumb is moved above in the Kapittha hand the result will be the $Ardhas\bar{u}c\bar{\iota}$ hand.

Uses

168. It is used to denote a sprout, young ones of a bird, and big worms.

Kataka

168-169. If the middle finger and the third finger are joined together the result is the *Kataka* hand.

Uses

169-170. It is used to denote calling and moving.

Palli

170. If in the $May\bar{u}ra$ hand the middle finger is put on the back of the fore-finger, the Palli hand will be the result.

Uses

171. It is used to denote a village or a hut.

166 This hand and the three following ones (167,168,169) have not been enumerated in the list of single hands (59-62). The MG. omits this hand, mentions two more single hands such as *Urnanābha* and *Bāṇa*.

168-170 The *lacunae* in the text have been suggested by the editor. The mss. do not show them.

171-172. These (single hands) will (also) form combined hands according to exegencies of the *abhinaya*. Their ways (characteristics) with reference to their objects will be shown in due order.

Combined Hands

172-175. According to older teachers including Bharata and others the combined hands are twenty-three in number. They are: Anjali, Kapota, Karkata, Svastika, Polā, Puspapuṭa, Utsanga, Sicalinga, Kaṭakāvardhana, Kartarīsvastika, Sakaṭa, Śaṅkha, Cakra, Sampuṭa, Pāśa, Kīlaka, Matsya, Kūrma, Varāha, Garuḍa, Nāgabandha, Khaṭrā and Bheruṇḍa.

Anjali

176. If two Patāka hands join the palms it is called the Anjali.

Uses

176-177. It is to be held on the head, face and bosom respectively in the salutation of a deity, preceptor and a Vipra (Brāhmaṇa).

172-175 In this connexion the MG. gives the following: 'when two single hands are combined that is a combined hand. Even though the origin and meaning remain the same the patron deity always differs'. But the origin and the patron deity have been mentioned only in the case of following hands: Añjali, Kapota, Karkata, Dolā, Puṣpapuṭa, Utsunga and Kaṭakāvardhana. Instead of twenty-three the MG. gives twenty-four Samyuṭa hands. The one additional hand here is called Avahittha which is two Alapadma hands held on the breasts. 'Erotic dance (śṛṅgāra-naṭana) holding a playball, and the breasts are its viniyoga (uses)'.

The MG. gives the following twenty-seven combined hands from another book:

अविहित्य, गजरन, नतुरस, तलमुख, खिलक, भाविह्नचक्र, रेचित, नितम्ब, लता, पचविह्यत, पचप्रयोत, गरूडपच, निषेध, मक्रर, वर्धमान, उद्दृश्त, विप्रकीर्थ, अराल, कटकमुख, स्चास्य, अर्धरेचित, केशवन्य, मुष्टि-स्वित्व, निलेश्व, उद्देशित, उद्देशित, उद्देशित, उद्देशित, विश्वन,

None of these names except *Svastika* is to be found in the list given in the present text. The MG. which is never tired of quoting gives a third list of (twenty-seven) *Samyuta* hands (p. 43). They are as follows:

विप्रकीर्थ, तलमुख, गजदन्त, स्चीविड, पद्धन, नितम्ब, केशवस्य, स्ता, द्विरद, उद्धत, सम्यम (१), सुद्रा, अजसुख, अर्थमुकुल, रेचित, कुशल, पचविचत, तिलक, उत्थानविचत, वर्डमान, ज्ञानरेखा (१), वैषाव, ब्रह्मोक्त, ग्रक्तुगढ, खगड्च रूर, अर्थचतुर, सीनसुद्रा.

The names and descriptions of these hands in many cases correspond to those mentioned above.

Kapota

177 The $A\tilde{n}jali$ becomes the Kapota when the two $(Pat\tilde{a}ka)$ hands meet only at their base, side and end.

Uses

178. It is to be used in the salutation, addressing a preceptor, respectful acceptance or agreement.

Karkata

178-179. When the fingers of one hand are run through the opening between fingers of the other and the fingers remain either inside (towards the palm) or outside (on the back of the hand) the hand is called the *Karkat*a.

Uses

179-180. It is used to denote the coming of a multitude, showing the belly, filling the conch-shell with wind, twisting or stretching of limbs and the pulling a branch down.

Svastika

180-181. When two $Pat\overline{a}ka$ hands are put across each other at their wrist, they form the Svastika hand.

Use

181. It is used to denote a crocodile (makara).

Dola

181. When the $Pat\bar{a}ka$ hands are placed on the thigh the $Pat\bar{a}ka$ hand is formed.

Use

182. It is used at the beginning of Nāṭya.

Puspaputa

182. When two Sarpaśirsa hands meet on one side they form the Puspapuṭa hand.

Uses

183. It is used in waving lights before an image or a god as an act of adoration, taking of water, fruit etc., giving offerings to gods, evening, and a flower invested with magical power.

Utsanga

184. If hands showing Mrgasīrṣa are placed on the upper arm of opposite hands the Utsanga hand is made.

Uses

185. It is used to denote embrace, displaying armlet and such other arnaments, and coaching of boys.

Śirali**ng**a

186. When the Ardhacandra is held by the left hand and the Śikhara by the right, the Śivalinga hand is made.

Use

186. It is used in showing the phallic symbol.

Kaṭakāvardhana

187. When a Svastika is made by placing two Katakāmukha hands at their wrists it is called Katakāvardhana.

Uses

188. It is used in coronation, worshipping, and marriage etc.

Kartarīs vastika

188. When a Svastika is made by two Kartarī hands (placed at their wrists) it is called Kartarīsvastika.

Uses

189. It is used to denote branches, hill tops, and trees.

Śakata

189. When the middle finger of the *Bhramara* hand is stretched it becomes Śakaṭa hand.

Use

190. This hand is often used in playing in the role of a Rākṣasa (demon).

Śankha.

190-191. When thumb of the $\pm ikhara$ hand meets the other thumb and is clung round by the fore-finger (close to the latter thumb) the hand is called $\pm ankha$.

¹⁸⁷ The SR. mentions this as the Khatakāvardhamāna.

Uses

191. It is used to denote conch-shell and such other things.

Cakra

192. When the palms in two Ardhacandra hands are put cross each other they make Cakra hands.

Uses

192. It is used to denote a cakra (wheel).

Sampuța

193. When the fingers in the Cakra hand are curved it is alled the Samputa hand.

Uses

193. It is used for covering things and in representing a box.

$P\bar{a}\dot{s}a$

194. When the fore-fingers of $S\bar{u}c\bar{\iota}$ hands are close to each ther (bent inwards) the hand is called $P\bar{a}\hat{s}u$.

Uses

194. It is used to denote a mutual quarrel, a string and a chain.

Kālaka

195. When the little fingers of the Mrgasīrṣa hands are bent nwards and close to each other the hand is called Kīlaka.

Uses

195. It is used to denote affection and jocose talk.

Matsya

196. When one hand is placed on the back of another and he two thumbs are outstretched the hand is called *Matsya*.

Use

197. It is used to denote a fish.

Kurma

197. When the tips of thumbs and little fingers of the Cakra hand are bent it is called the $K\bar{u}rma$ hand.

Use

198. It is used to denote a tortoise.

Varāha

198. When one Mṛgaśārṣa is placed above another and the

humb of the one hand meets that of the other and vice versa he hand is called $Var\bar{a}ha$.

Trsc

199. It is used to denote a boar.

Garuda

200. When plams of two Ardhacandra hands are placed iorizontally with the two thumbs placed on each other the hand is alled Garada.

Use

200. It is used to denote Garada.

Nāgabandha

201. The Sarpašīrṣa and the Svastika hands placed together vill make the $N\bar{a}gabandha$ hand.

Use

201. It is used to denote the Nvgabandha.

$Khatv\bar{a}$

202. Placing one Catura hand on another Catura hand with the ore-finger and the thumb of each released, will make the $Khatv\bar{a}$ hand.

Uses

202. It is used to denote a bedstead and a litter.

Bherunda

203. When the two Kapittha hands are joined at their wrists he Bherunda hand will result.

Uses

203. It is used to denote the Bherunda, and a pair of birds.

Hands for Deities

204. Now the hands which are prescribed for the dramatic representation and the sculptural construction of deities are being lescribed in the following order.

²⁰³ A fabulous being named Bherunda is sometimes met with in the Bengali folk-lore.

Brahmā

205. Brahmā is to hold the Catura with his left hand, the Hamsāsya with his right.

Sira

205. Sive is to hold the Mygasirsa with his left hand and the $Tripat\bar{a}ka$ with the right.

Tisnu

206-207. Viṣṇu is to hold the Tripatāka with both his hands.

Sarasratī

206. Sarasvatī is to hold the $S\bar{u}c\bar{\iota}$ with her right hand and the Kapittha with the left raised on a level with the shoulders.

Pārvatī.

207-208. Pārvatī is to hold the Ardhacandra with the right hand held up, and the Ardhacandra should be held by the left hand also but it should be held down. The two hands should be in Abhaya (fear-dispelling) and Varada (giving a boon) pose respectively.

$Laksm\bar{\imath}$

208. Laksmi is to hold the *Kapittha* hands near about her shoulders.

Ganeśa

209. Gaņeša is to hold the Kapittha hands placed on his thighs.

Kartikeya

209-210. Kārtikeya is to hold the $Tris\bar{u}la$ with his left hand and the $\acute{s}ikhara$ with the right held up.

Manmatha

210-211. Manmatha is to hold the Śikhara with his left hand and the Katakāmukha with the right.

Indra

211. Indra is to hold the $Tripat\bar{a}ka$ and the Svastika in his two hands.

²⁰⁵ The MG. mentions 'Siva' as 'Sambhu'.

²⁰⁹ The MG. mentions 'Ganeśa' as 'Vighneśvara'.

Agni

212. Agni is to hold the $Tripat\bar{a}ka$ with his right hand and the $K\bar{a}igula$ with the left.

Yuma

213. Yama is to hold the $P\bar{a}\hat{s}a$ with his left hand and the $S\bar{u}c\bar{\iota}$ with the right.

Nirrti

213. Nirrti is to hold the $Khatv\bar{a}$ and the Sakata with her two hands.

Varuna

214. Varuṇa is to hold the $Pat\bar{a}ka$ with his left hand and the &ikhara with the right.

Vayu

214-215. Vāyu is to hold the $Ar\bar{a}la$ with his right hand and the $Ardhapat\bar{a}ka$ with the left.

Kurera

215. Kuvera is to hold the $Padm\bar{a}$ (lotus) with the left hand and the $Gad\bar{a}$ (mace) with the right.

Hands for the Ten Avatāras.

Matsya

216. Show the Matsya hands on the same level with the shoulders. This is called the hand of the $Matsya-Avat\overline{a}ra$.

Kurma

217. Show the $K\bar{u}rma$ hands on the same level with the shoulders. This is called the hand of the $K\bar{u}rma$ - $Avat\bar{u}ra$.

Varāha

218. Show the $Var\bar{a}ha$ hands on a level with the waist and keep them on the sides. This is called the hand of the God $Adivar\bar{a}ha$.

Nrsimha

219. Hold the Simhamukha with the left hand and Tripatāka with the right. This is called the hand of Narasimha.

Vāmana

220. If the left hand holds the Musti up and the right hand also holds the Musti but downwards, the result will be $V\bar{a}mana's$ hand.

Parasurāma

221. If the left hand is placed in the waist and the Ardha-patāka is held by the right hand, the result will be Paraśāurma's hand.

Rāmacandra

222. If the Kapittha is held by the right hand and the Sikhara by the left, the result will be $R\bar{a}macandra$'s hand.

Balarama

223. If the $Pat\bar{a}ka$ is held by the right hand and the Musti by the left, the result will be $Balar\bar{a}ma$'s hand.

Krsnu

224. If the Mrgasirsa hands facing each other are held near the face, the result will be Krsna's hand.

Kallsi

225. If the $Pat\bar{a}ka$ is held by the right hand and the $Tri-pat\bar{a}ka$ by the left, the result will be Kalki's hand.

Rākṣasa

226. If the &akata hands are held at the mouth the result will be the hand of a $R\bar{a}k$, asa.

Brāhmaņa

226-227. When the Sikhara is held by two hands and the

223. The MG. mentions Ramacandra of Ayodhya as Raghurama.

right hand is held horizontally to indicate the sacred thread, the result is the $Br\bar{a}hmana$ hand.

Kşatriya

227-228. If the Sikhara is held horizontally by the left hand and the $Pat\bar{a}ka$ is held by the right, the result is the Ksatriya hand.

Vaisya

228-229. If the Hamsāsya is held by the left hand the the Katakāmukha by the right, the result will be the Vaisya hand.

Śūdra.

229-230. If the $\pm ikhara$ is held by the left hand and the $Mrga \pm irsa$ by the right, the result will be the $\pm irdra$ hand.

230-231. In a similar manner there will be hands named after the eighteen castes according to their profession. Hands of the inhabitants of different countries are also to be understood by the wise people in a similar manner.

Husband and Wife

231-232. If the Sikhara is held by the left hand and the Mṛṇaśīrṣa by the right, the result will be the hand of Man as well as of Woman.

Mother

232. If the Ardhacandra is held by the left hand and the Sandamśa by the right, and the left hand is turned round over the belly, the result will be the Mother hand.

TISE

234-235. It is used to denote the mother and a maid.

Father

234. If the right hand of the Mother hand holds the Sikhara, the result will be the Father hand.

Uses

235. It is used to denote the father and the son-in-law.

Mother-in-law

236-237. If the Hamsāsya is held by the right hand at the throat and the Sandamśa is held by the right, and the left hand is afterwards rubbed round the belly, the result will be the Mother-in-law hand.

Father-in-law

237-238. If in the right hand of the Mother-in-law hand the Śikhara is held, the result is the Father-in-law hand.

Husband's Brother

238-239. If the Śikhara is held by the left hand and the Kartarīmukha is held by the right, and the hands are placed on sides, the result is the hand of the Husband's brother.

Husband's Sister

239-240. If at the end of the preceding hand the right hand shows the gesture indicating a woman (i.e., the $Mrga\tilde{s}\bar{\imath}rsa$), the result will be the hand of the Husband's sister.

Elder and Younger Brothers'

240-241. If the *Mayūra* hands are shown in the front and on the two sides, the result will be the hand of the Elder and of the Younger brother.

Son

241-242. If one holds the Sandamsa on the belly and moves it afterwards and holds the Sikhara by his left hand, the Son's hand results.

Daughter-in-law

242-423. If after showing the son's hand one snows with the right hand the gesture expressing a woman (i.e. Mrgasīrša), then the result will be the Daughter-in-law's hand.

Co-wife

243-244. If one shows the gesture for a woman (i.e. *Mrgašīrṣā*) with both the hands after showing the *Pāśa* hand, then the Co-wife's hand is made.

- 244-246. The movements of *Nrtta-hastas* is of five kinds. They are known to be movements upwards, downwards, on the right, on the left and in the front. The moving of hands should be in the manner of that of the feet. The left one (foot or hand) should be on the left and the right one on the right. This is noticed by those who know the rules of *Nrtta*.
 - 247. (See the translation of the verse 28.)

Hands fit to be used in Nrtta

248-249. The thirteen hands such as $Pat\bar{a}ka$, Svastika, $Pol\bar{a}$, $A\bar{n}jali$, $Kaṭak\bar{a}vardhana$, $\acute{S}akaṭa$, $P\bar{a}\acute{s}a$, $K\bar{\imath}laka$. Kapittha, $\acute{S}ikhara$, $K\bar{u}rma$, $Hams\bar{a}sya$ and Alapadma are fit to be used in Nrtta.

The Sun

250. If the Alapadna and the Kapittha are shown by two hands near about the throat, the Sun's hand is formed.

The Moon

251. If the Alapadma is shown by the left hand and the $Pat\bar{a}ka$ by the right, the hand produced is called that of the Moon.

Mars

252. If the $S\bar{u}c\bar{i}$ is shown by the left hand and the *Muṣṭi* by the right, Mars's hand is produced.

Mercury

253. If the *Musti* is horizontally held by the left hand and the $Pat\bar{a}ka$ by the right, then Mercury's hand is produced.

Jupiter

254. Showing the Sikhara hands to indicate the sacred thread will make the hand of a Rsi or the Brahmin as well as that of Jupiter.

^{250.} The Navagraha hands have been given by the MG. after 223.

Venus

255. To hold the *Musți* with both the hands and to keep the left hand high up and the right down, will make the Venus's hand.

Saturn.

256. To show the $\pm ikhara$ with the left hand and the $Tris\overline{u}la$ with the right is to make Saturn's hand.

$R\bar{a}hu$

257. To show the Surpasirsa with the left hand and the $S\bar{u}c\bar{\iota}$ with the right, is to make the hand of $R\bar{a}hu$.

Ketu

258. To show the $S\bar{u}c\bar{\imath}$ with the left hand and the $Pat\bar{a}ka$ with the right, is to make the hand of Ketu.

Feet in Dance

259-260. Feet in different positions and with different movements will be described in accordance with the old tradition. These (positions and movements) give rise to Mandala (posture), Utplavana (flying movement or jumping), $Bhr\bar{a}mar\bar{\imath}$ (spiral movement) and $P\bar{a}dac\bar{a}r\bar{\imath}$ or $C\bar{a}r\bar{\imath}$ (gait). Their definitions are to follow.

Postures (Mandala)

260-261. There are ten postures: Sthānaka (simple standing), Āyata, Ālīḍha, Pratyālīḍha, Prenkhaṇa, Prerita, Svastika, Moṭita, Samasūci and Pārśvasūcī.

Sthānaka

262. Standing with $Samap\bar{a}da$ feet in the same line and touching the hip with Ardhacandra hands, will be $Sth\bar{a}naka$.

Ayata

263. Standing with two feet half a cubit apart from each other in a *Caturasra* posture and at the same time bending knees a little apart and placing one of them upon the other, will give rise to $\overline{A}yata$ posture.

Alīdha

264-265. Place the left foot before the right one at a distance of one cubit and a half, make the $\pm ikhara$ with the left hand and $\pm Katakamukha$ with the right; this, according to Bharata and others, will give rise to the $\pm \overline{A}lidha$ posture.

$Praty\bar{a}l\bar{\imath}dha$

266. If hands and feet are interchanged in the $\overline{A}lidha$ posture, it will be called $Praty\overline{a}l\overline{i}dha$.

Prenkhana

266-267. Putting one foot by the side of another heel and having $K\bar{u}rma$ hands, will give rise to the Preikhana posture.

Prerita

267-269. Putting one foot violently (on the earth) at a distance of one cubit and a half from another and standing with knees bent and one of them put across another and holding $\dot{sikhara}$ hand in the breast and showing $Pat\bar{a}ka$ hand stretched out, will give rise to Prerita posture.

Svastika

269-271. The right foot should be put across the left foot and the right hand should be put across the left hand: thus will be the *Svastika* posture.

Moțita

271-272. Stand on the earth with the forepart (toes) of the feet and touch the earth with each knee alternately and make *Tripatāka* with both the hands; this will give rise to *Motita* posture.

Samasīicī

272. A posture in which the earth is touched with toes and knees is called $Samas\bar{u}c\bar{\iota}$.

Parśvasūcī

273. A posture in which the earth is touched with toes and by one knee on one side is called $P\bar{a}r\hat{s}vas\bar{u}c\bar{s}$.

Varieties of Simple Postures (Sthānaka)

274-275. Simple postures are of six kinds according to the placing of feet. They are $Samap\bar{a}da$, $Ekap\bar{a}da$, $N\bar{a}gabandha$, Aindra, $G\bar{a}ru\bar{d}a$ and $Brahm\bar{a}$.

Samapāda

275. Standing with two feet alike is called Samapāda.

Uses

276. It is used in offering flowers (to god) and playing in the role of gods.

Ekapāda

276. Standing with one foot and laying the other across the knee of that foot will give $Ekap\bar{a}da$ position.

Uses

278. It is used to denote motionlessness and the practice of penance $(tapasy\bar{a})$.

$N \bar{a} g a b a n d h a$

277b-278. Standing like a serpent intertwining two feet and two hands together will give $N\bar{a}gabandha$ posture.

Use

278. It is used in showing the Nagabandha.

Aindra

278-279. Standing with one leg bent and the other leg and knee raised and hands hanging naturally will give rise to Aindra posture.

Uses

279. It is used in depicting Indra and a king.

$G\bar{a}ruda$

279-281. If in the $\overline{A}l\bar{\imath}dha$ posture one knee is put on the ground and the two hands jointly show the jesture, it will be the $G\bar{\imath}ruda$ posture.

Tise

281. It is used to denote Garuda (the vehicle of Visnu).

Brahmā

281-282. Sitting with one foot on one knee and another toot on another knee will give rise to $Brahm\bar{a}$ posture.

282. It is used to denote japa (repeated muttering of prayers) and similar matters.

Different Kinds of Jumps (Utplavana)

282-283. Now, the definition of various jumps will be given. They are of five kinds:—Alaga, Kartarī, Aśva, Moţita and Kṛpālaga.

Alaga

284. Jumping with both the feet and placing Śikhara hand on the hip, at the same time, will be Alaga.

$\cdot Kartari$

255-286. Jumping on toes with Kartarī hands held behind the left foot, at the same time, will be Kartarī jump.

Aśva

286-287. First, jump on two feet and then place them together, and make $Tripat\bar{a}ka$ with both the hands. This will be $A\hat{s}va$ jump.

Moțita

287-288. Jumping on both sides alternately like a Kartarī, will be Moţita jump.

$Krp \bar{a} laga$

283-289. Place the heel of both feet alternately on the hip and keep Ardhacandra hands between the two. This will make $Krp\overline{a}laga$.

Various Spiral Movements (Bhrāmarī)

289-291. Here, we shall describe various spiral movements (in a dance). According to persons versed in the Nātyaṣāstra they are seven: Utpluta, Cakra, Garuḍa, Ekapāda, Kuncita, Ākāṣ́a and Ānga.

Utpluta

292. If a person moves round his entire body from a $Sama-p\bar{a}da$ posture, he is said to perform $Utpluta\ bhramar\bar{i}$.

Cakra

293. If keeping feet on the earth and carrying $Tripat\bar{a}ka$ hands one moves round rapidly he performs $Cakra\ bhramar\bar{\imath}$.

Garuda

294. Stretch one foot across another and put the knee on the earth and then move about rapidly with outstretched arms. This will be *Garu***q***a bhramar***ī**.

Ekapada

295. Moving round alternately on one foot will be $Ekap\bar{a}da$ bhramar $\bar{\imath}$.

Kuncita

296. Moving round with knees bent will be Kuncita bhramarī.

Akāśa

296-297. If one moves round his entire body after making his fully-stretched feet wide apart in a jump, he will make $\overline{A}k\overline{a}sa$ bhramarī.

Anga

297-298. If one jumps with feet half a cubit apart and then stops, he performs Ainga bhramarī.

Different Gait

298-300. Now the definition of various $C\overline{a}r\overline{i}s$ will be told by me. According to persons who know Bharata's works well they are eight: Calana, Cankramana, Sarana, $Vegin\overline{i}$, Kuttana, Luthita, Lolita, and Visama.

A-6

TIRUPATI

Calana (walking)

301. Advancing a foot from its natural place will be Calana (walking).

Cankramana (making a leap)

301-302. Persons well-versed in $n\bar{a}tya$ say that a gait made by two feet carefully raised up and thrown sideways alternately is called Cankramana (making a leap).

Sarana (moving)

302-303. Moving like a leach that is covering ground, by joining one heel with another (at each step) and holding at the same time $Pat\bar{a}ka$ hands is called Sarana (moving).

Veginī (running)

304-305. If a naṭa walks swiftly on his heels or toes or by his entire sole, and holds Alapadma and Tripatāka hands alternately he is said to go with a Veginī (running).

Kuttana (pounding)

305-306. The striking of the earth with the heel or the fore-part of a foot or the entire sole is called *Kutṭana* (pounding).

Luthita (rolling)

306. Performing the Kuttana from the Svastika posture is called Luthita (rolling).

Lolita (trembling)

307. Slowly moving a foot which has not touched the earth after performing the *Kuttana* as described before is called the *Lolita* (trembling) gait.

Vișama (rough)

308. Setting the left foot to the right of the right one, and the right foot to the left one alternately at the time of walking is called the *Viṣama* (rough) gait.

Different Kinds of Stepping.

309-310. The different kinds of stepping with their definitions will be told gradually. These are ten in number: Goose-step, Peacock-step, Deer-step, Elephant-step, Horse-step, Lion-step, Snake-step, Frog-step, Heroic step and Human step.

Goose-step.

311-312. Placing slowly one foot after another at a distance of half a cubit and bending on two sides alternately and carrying the $Tripat\bar{a}ka$ with both the hands will be stepping like a goose.

Peacock-step

312-313. To stand on toes and to carry Kapittha in both the hands and to move both the knees alternately will be making Peacock steps.

Deer-step

313-314. Running forward or sideways like a deer with $Tripat\bar{a}ka$ on both the hands will be called Deer-step.

$Elephant\mbox{-}step.$

314-315. To walk slowly with $Samap\bar{a}da$ feet with hands holding $Pat\bar{a}ka$ on both sides is to have the Elephant step.

Horse-step

315-316. To raise the right foot and jump in quick succession and to hold the $\acute{s}ikhara$ with the left hand and $Pat\bar{a}ka$ with the right (hand) will be the Horse-step.

Lion-step

317. First stand on toes and then jump forward swiftly and proceed in this manner with the Sikhara held in both the hands. This will be the Lion-step.

Snake step

318. If one holds the *Tripatāka* with both hands and on both sides and walks as before (swiftly) he is said to move like a snake.

Frog-step

319. If one holds the $\pm ikhara$ with both hands and jumps almost like a lion he is said to go with Frog-steps.

Heroic step

320. Coming from a distance holding the $\hat{sikhara}$ with the eft hand and the $Pat\bar{a}ka$ with the right will be called the Heroic step.

Human step

321-322. When one goes round in quick succession and puts he left hand on the waist, holds the *Katakāmukha* with the right, he s said to move with Human steps.

323-325. Mandalas, Utplavanas, Bhramarīs, Cārīs, Gatis according to their relation to one another are endless in number and variety. Uses of these in dance and drama are to be learnt from he sastras and tradition, and through the favour of good people.
